Core Recognition Flow (D-15 Spine)

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `core-spine`

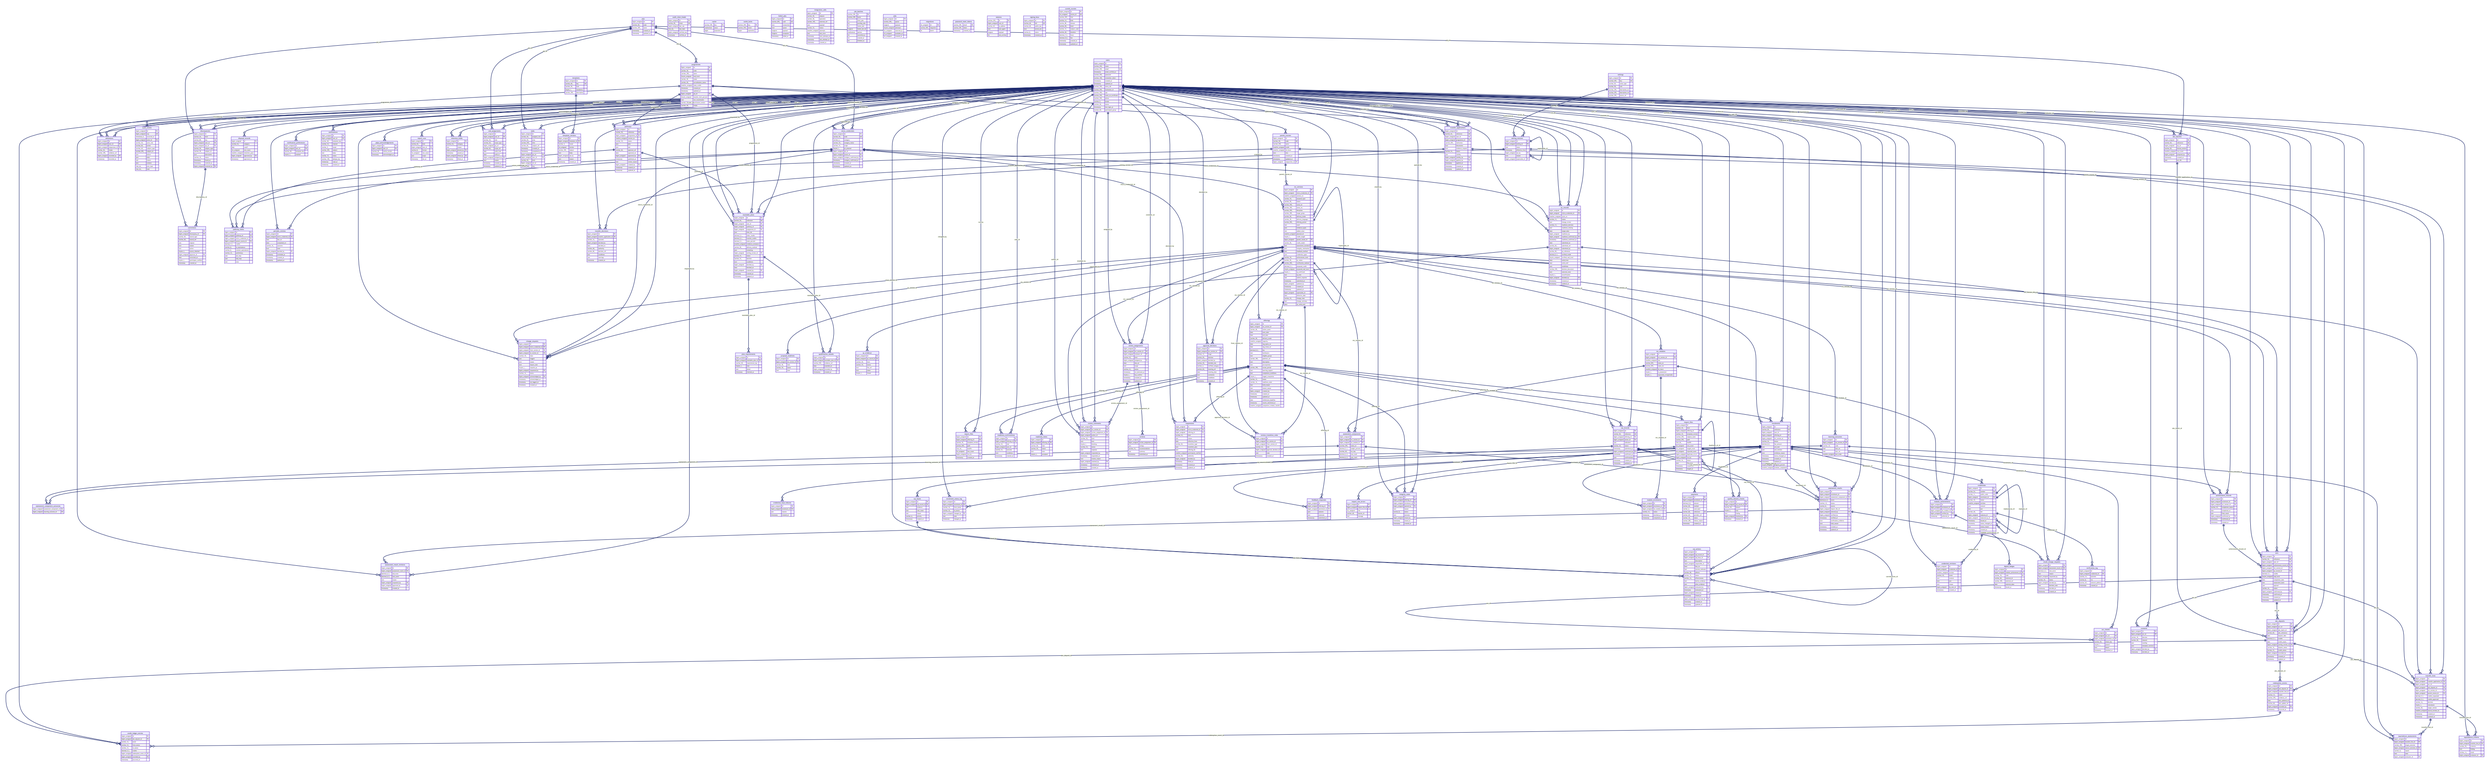

Architecture & Data Rules: The primary statutory recognition lifecycle across all 7 stages: Registration -> Enrolment -> Result -> Achievement -> Credential -> ACR -> ABC Deposit -> Credit Transfer. Each stage creates its own immutable record.

UTeM Micro-Credential Management System (MCMS) — Whole System ERD

Complete Relational Database Architecture across All 8 Functional Domains · Generated from Official SDD v1.2 & Database Schema

92 Tables | 185 Foreign Keys | Format: A1 Landscape (841 × 594 mm)

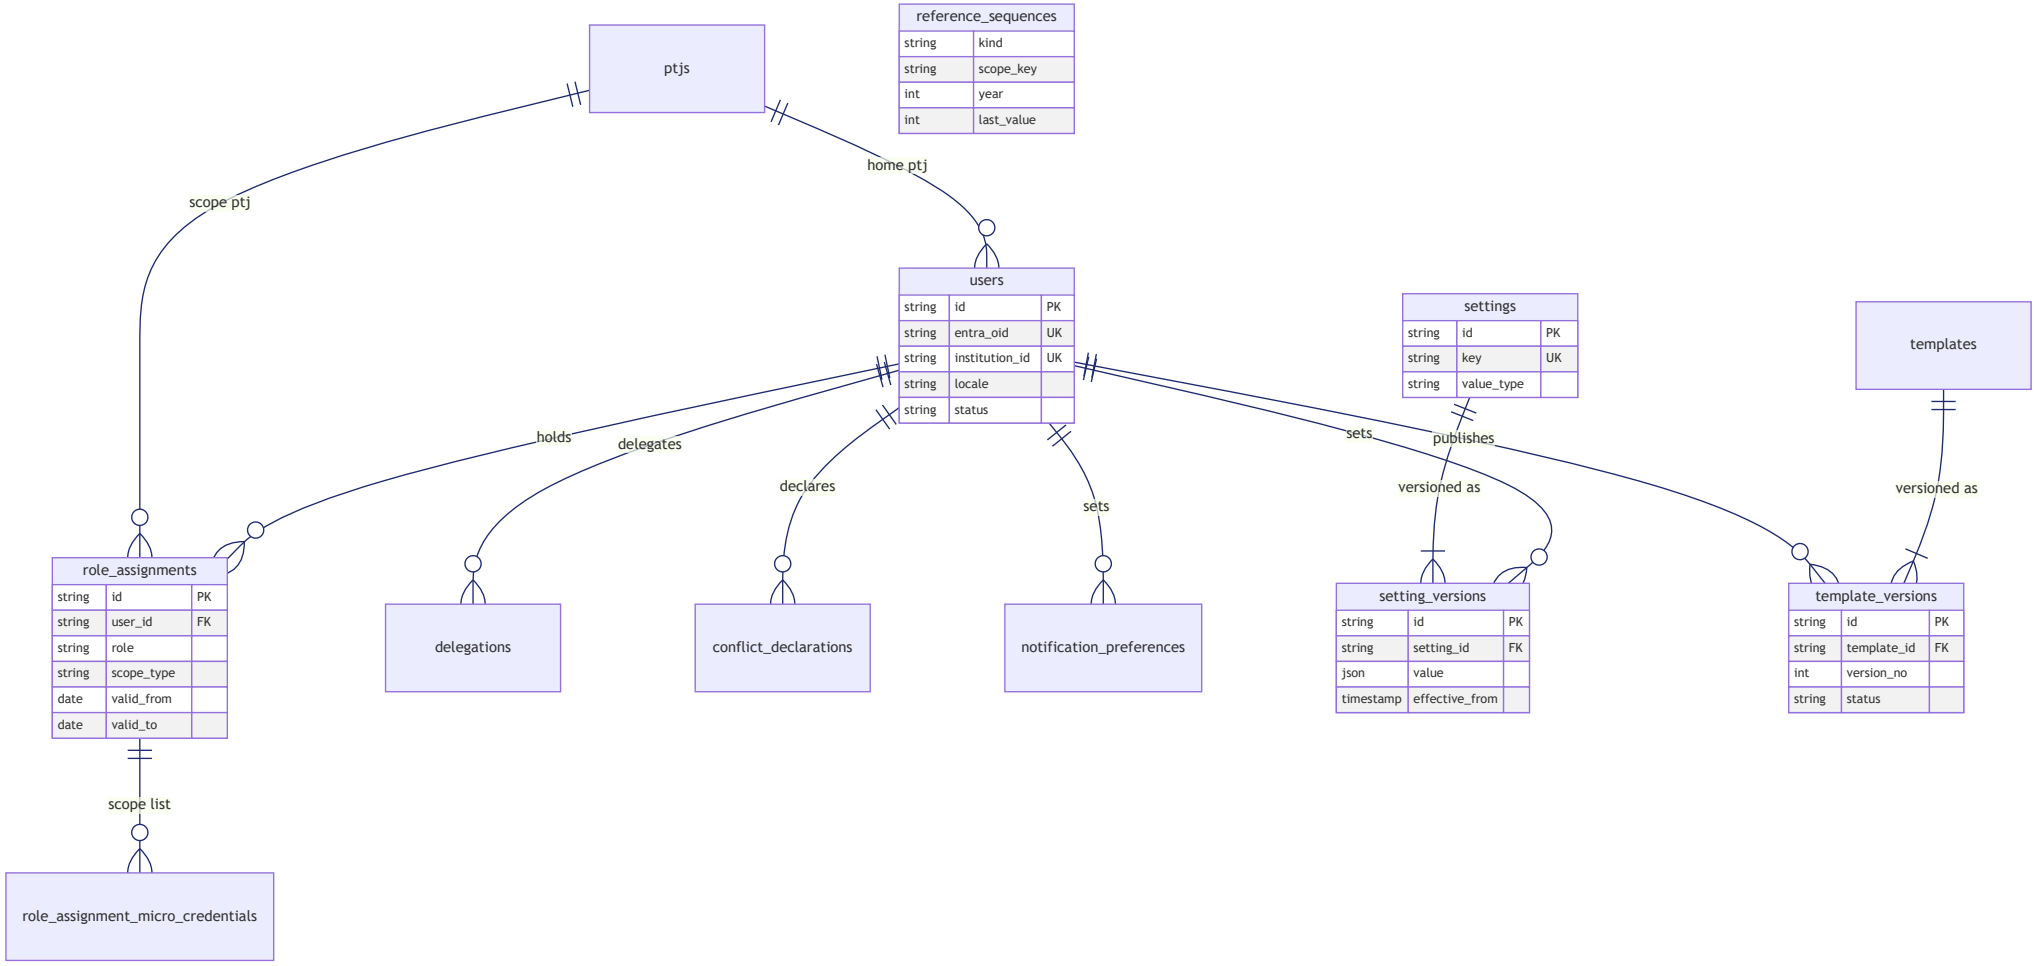

1. Identity & Settings

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `data-erid`

Architecture & Data Rules: Identity, role scope, settings and templates. reference_sequences stands alone: it is read only by the number generator.

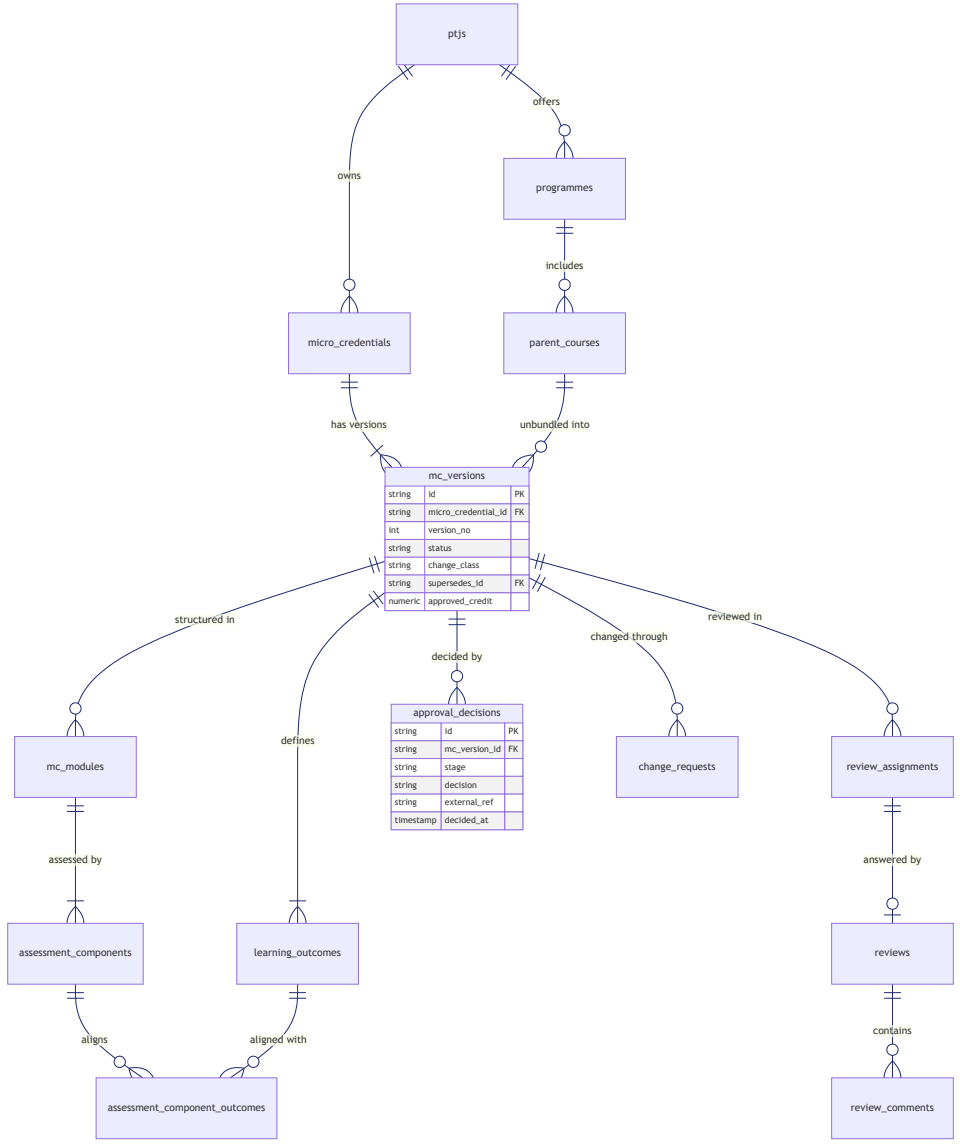

2. Curriculum & Approval

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `data-ercur`

Architecture & Data Rules: Micro-credentials, immutable versions, learning design, reviews and approval decisions. proposal_collaborators and version_transition_rules also point to mc_versions and are left out to keep the figure small.

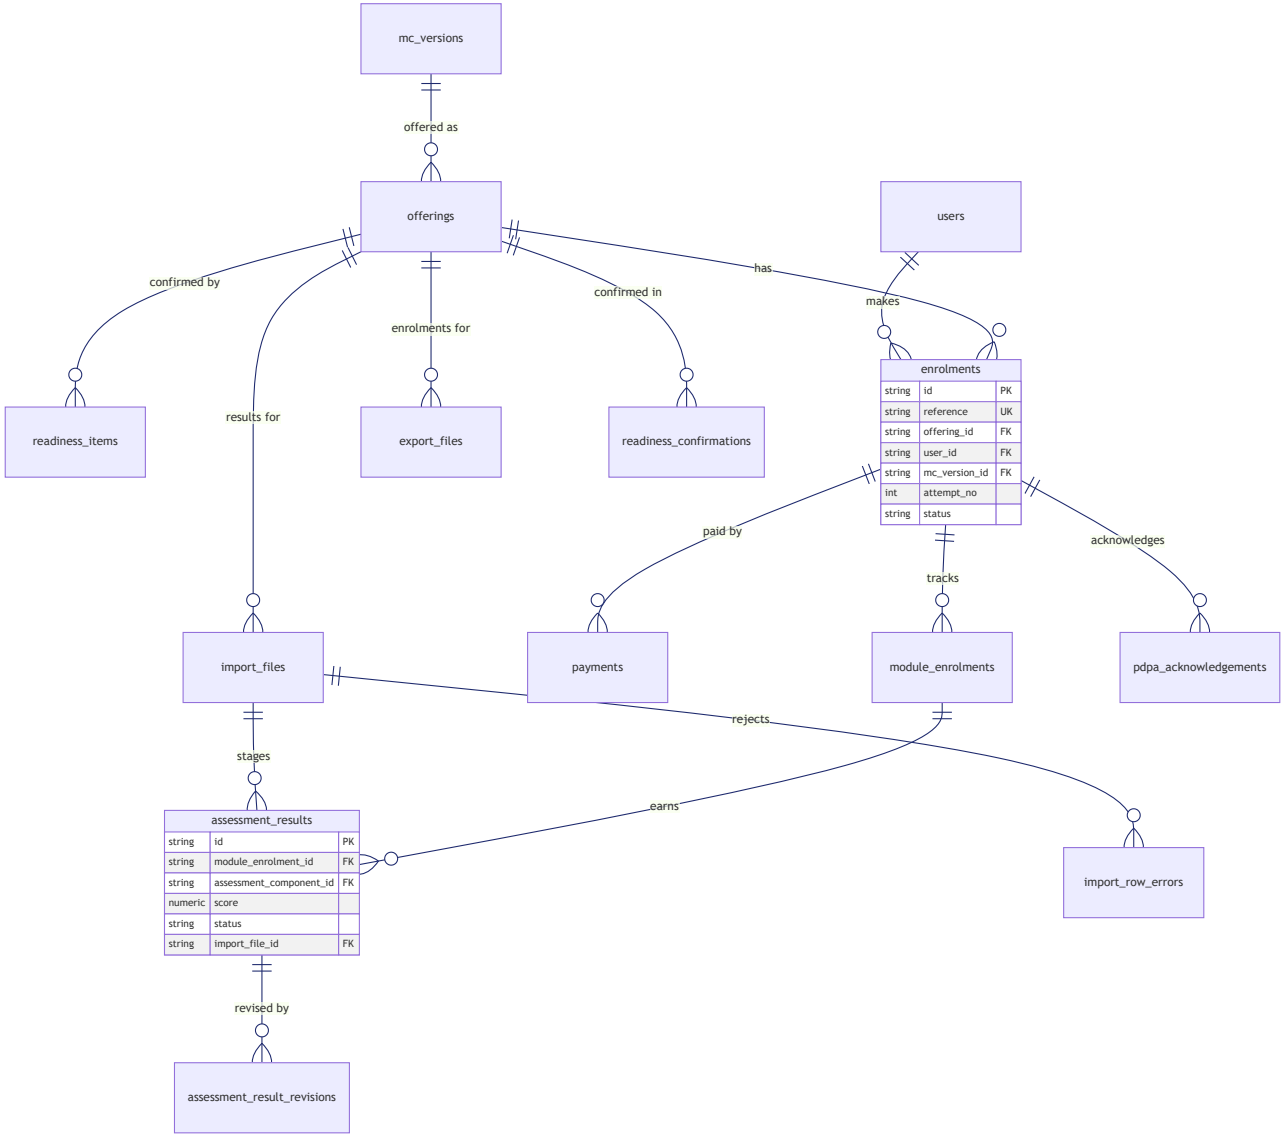

3. Offering, Enrolment & Results

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `data-eroff`

Architecture & Data Rules: Offerings, registration, payment, UCreds exchange and results.

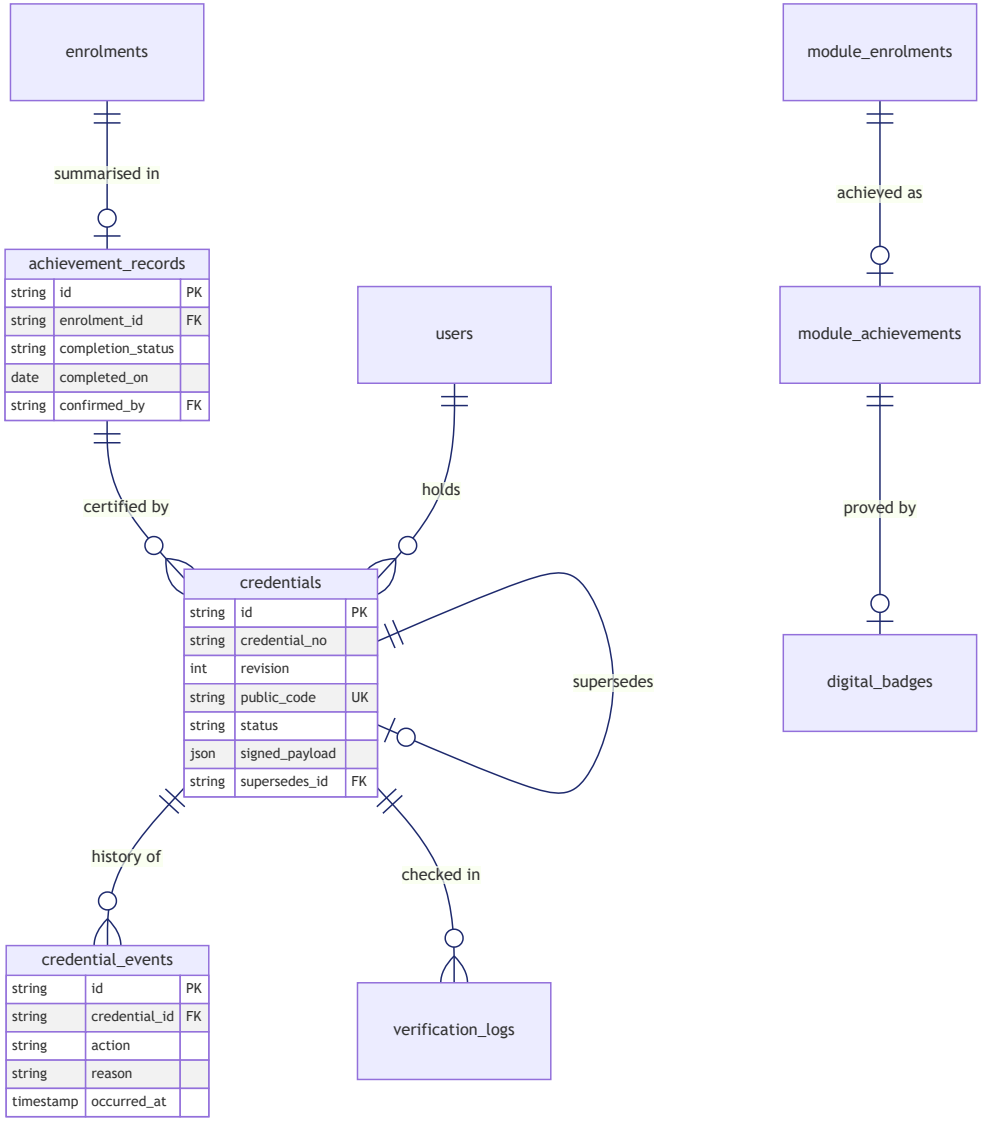

4. Credentials & Achievement

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `data-ercred`

Architecture & Data Rules: The Achievement Record, module badges, certificates and credential history. A credential row is never edited after issue.

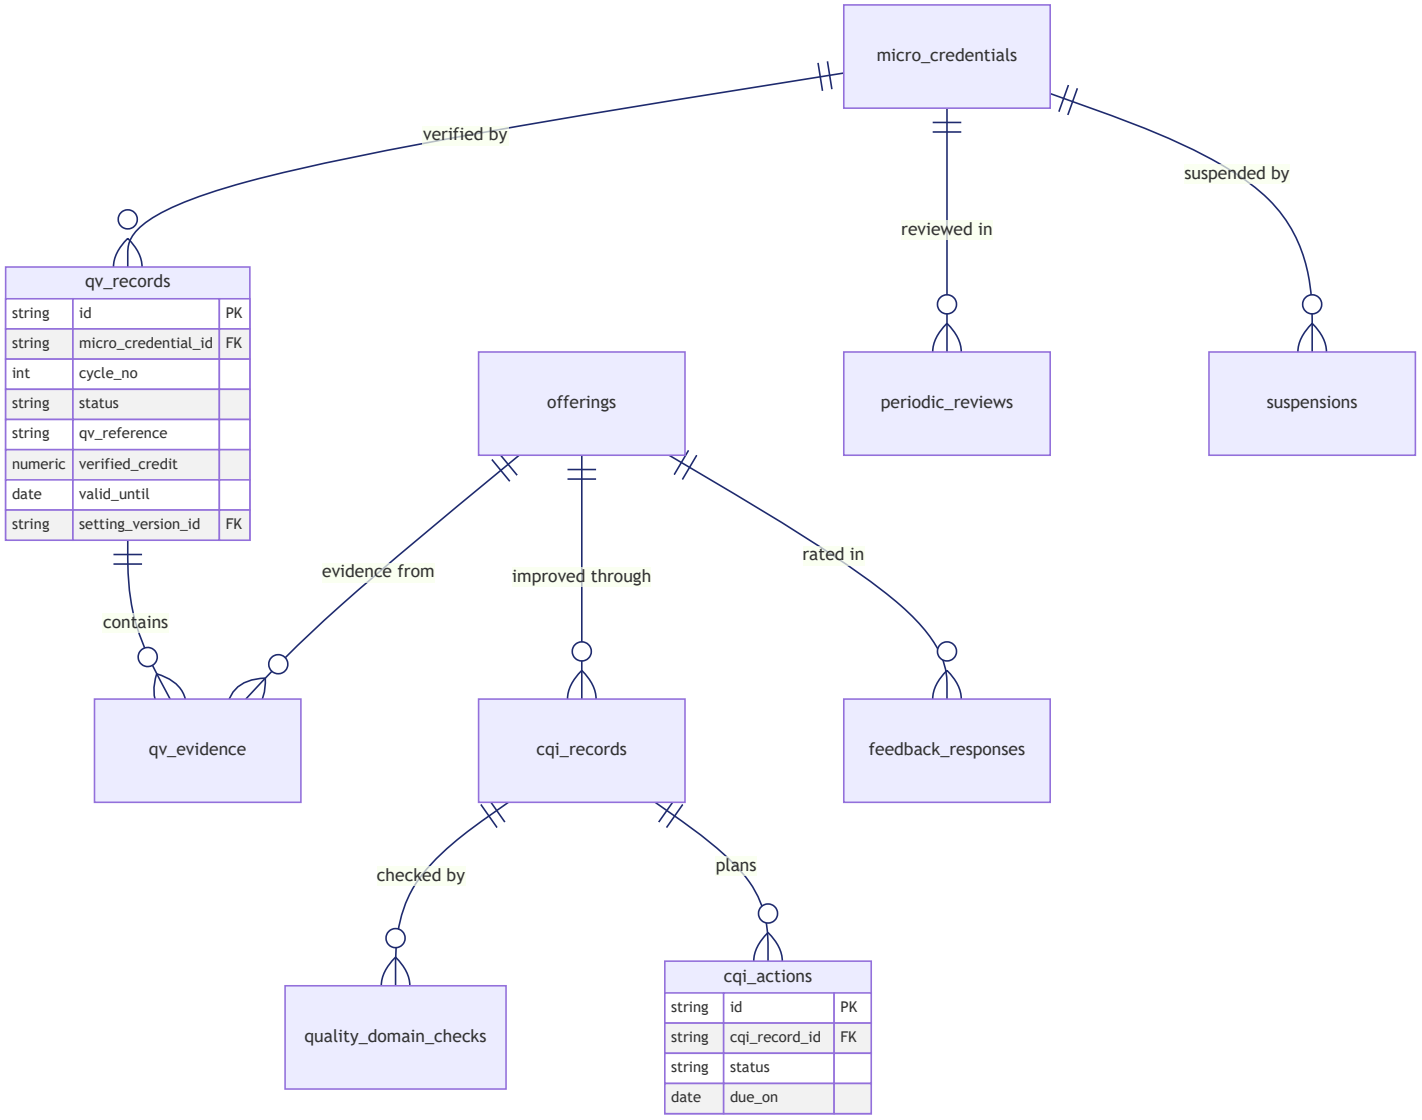

5. Quality Verification (QV)

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `data-erqv`

Architecture & Data Rules: QV cycles and evidence, CQI, periodic review and suspension.

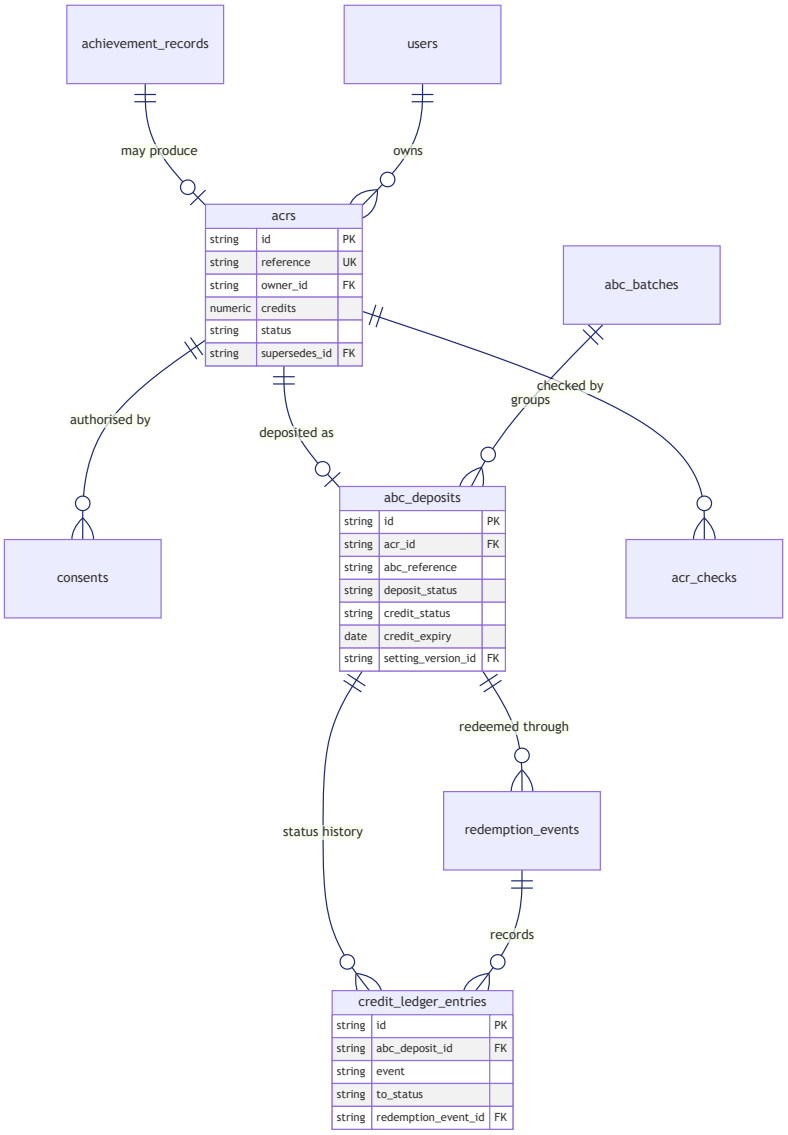

6. Credit Bank & ABC Platform

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `data-ercb`

Architecture & Data Rules: ACR, consent, ABC deposit and the credit ledger.

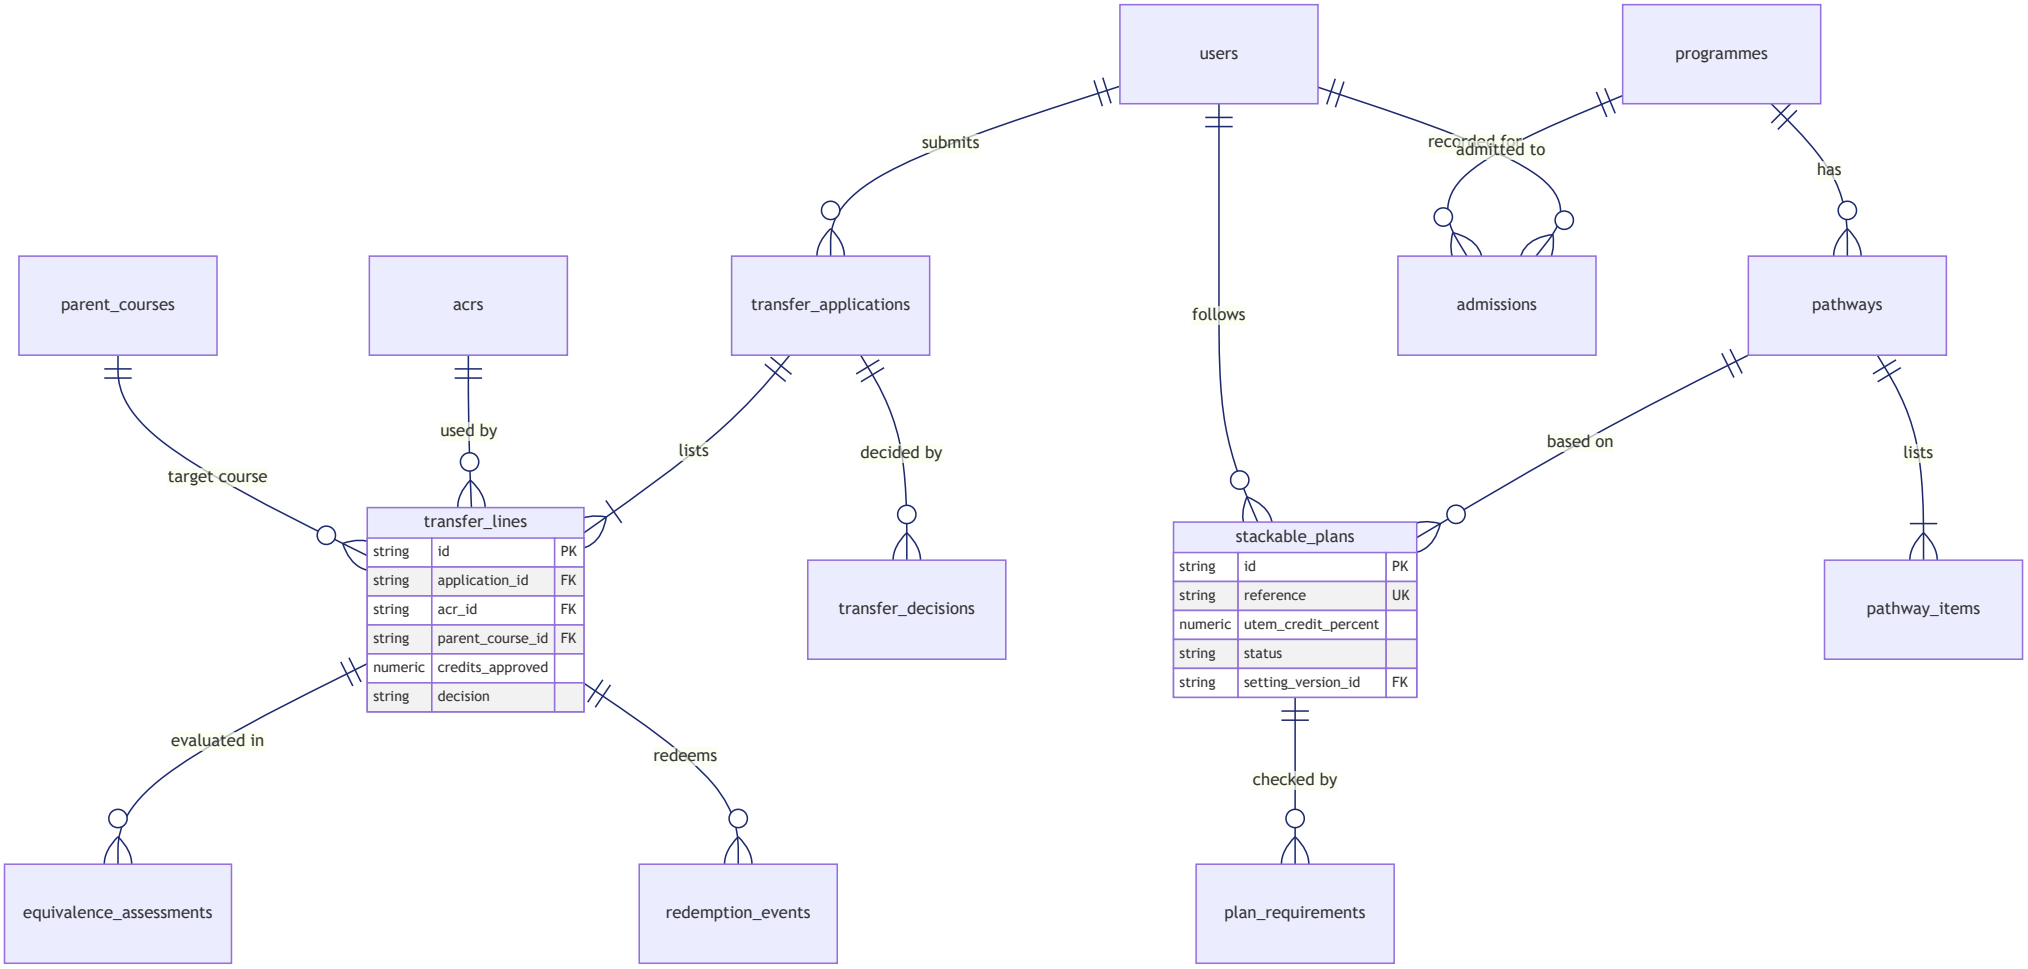

7. Credit Transfer & Pathways

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `data-ertr`

Architecture & Data Rules: Credit transfer, stackable pathways and admission records.

8. Audit, Logs & Infrastructure

UTeM Micro-Credential Management System (MCMS) · Database Entity-Relationship Specification

`Format: A4 Landscape` `data-eraud`

Architecture & Data Rules: Audit trail, notifications, integration jobs, files, corrections, reports and retention holds. integration_jobs refers to its subject by soft reference.
