UCreds Public Portal Audit & Complete Course Directory

Comprehensive Platform Architecture, Pedagogical Taxonomy, Student Support Services, and MCMS Integration

Document Control

Document Information	
Title	Comprehensive Audit, Pedagogical Taxonomy, and Course Directory of the UCreds Public Portal
Date	27 October 2026
Status	Official Technical & Academic Audit Report
Version	1.0
Target Portal	https://ucreds.utem.edu.my/ (Centre for Open and Distance Learning - CODL, UTeM)
Prepared for	Centre for Open and Distance Learning (CODL) & Senate Micro-Credential Committee, Universiti Teknikal Malaysia Melaka
Prepared by	Aliff, Intern
Reference	UCREDS_AUDIT_V1.0_Oct_2026
Document Set	Aligned with UTeM MCMS SRS v1.0, PRD v1.0, SDD v1.0, and Garis Panduan Micro-Credential UTeM

Disclaimer:

This audit document is prepared as a rigorous, systematic technical and curriculum assessment of the public-facing assets of UCreds (https://ucreds.utem.edu.my/). The audit was executed entirely against publicly accessible interfaces and institutional documentation without bypassing authentication barriers or accessing restricted learner data. Pedagogical rules, credit transfer principles, and stackable pathways cited herein are referenced from the official Garis Panduan Micro-Credential Universiti Teknikal Malaysia Melaka (2025/2026) and Malaysian Qualifications Agency (MQA) guidelines.

Table of Contents

1. Executive Summary & Audit Scope
- 1.1 Executive Summary
- 1.2 Audit Objectives
- 1.3 Scope and Methodology

2. System Architecture & Technical Infrastructure
- 2.1 Platform Overview & Technology Stack
- 2.2 Identity Federation and Single Sign-On (SSO)
- 2.3 Data Flow & Catalog Retrieval Model
- 2.4 Security Perimeter & Network Isolation

3. Academic Framework, Stackable Pathways & Credit Governance
- 3.1 Micro-Credential Architecture at UTeM
- 3.2 The Stackable Degree Pathway
- 3.3 The Journey of a Credit in UCreds
- 3.4 Accreditation Status & Quality Verification

4. Comprehensive Course Directory (The 60 Public Offerings)
- 4.1 Public Catalog Overview & Statistical Breakdown
- 4.2 ODL Master Degree Programmes
- 4.3 Mathematics, Calculus & Computational Methods
- 4.4 Artificial Intelligence, Data Science & Machine Learning
- 4.5 Cybersecurity, Information Security & Privacy
- 4.6 Database Engineering & Big Data Management
- 4.7 Software Engineering, Programming & Mobile Apps
- 4.8 Advanced TVET, Robotics & Mechanical Engineering
- 4.9 Languages, Communication & Soft Skills
- 4.10 The Underlying Moodle Repository (214 Course Instances)

5. Flagship Course Profiles & In-Depth Syllabi
- 5.1 Profile 1: Master of Technology in Data Science and Analytics (ODL) [ID 80]
- 5.2 Profile 2: Master of Business Administration (ODL) [ID 78]
- 5.3 Profile 3: First Order Differential Equations [ID 155] (Mathematics Series)
- 5.4 Profile 4: Introduction to Deep Learning (MAXL5143) [ID 517]
- 5.5 Profile 5: Fundamentals of a Database [ID 644]
- 5.6 Profile 6: Mudahnya Robot Mudah Alih! [ID 573] (Mobile Robotics)
- 5.7 Profile 7: Phishing Techniques & Cyber Hygiene [ID 486]

6. Student Support Infrastructure, Knowledge Base & Policies
- 6.1 Central Helpdesk & Technical Support
- 6.2 The Student Support Knowledge Base (36 Articles Analyzed)
- 6.3 Key Institutional Policies and Regulations

7. Visual Audit & Complete Portal Interface Gallery
- 7.1 Comprehensive Visual Evidence
- 7.1 Platform Landing, Navigation & Public Entry
- 7.2 Catalog Subsystem & Browsing Facets
- 7.3 Flagship Course Overviews & Pedagogical Outlines
- 7.4 Student Support Knowledge Base & Institutional Guidance

8. Strategic Alignment & Integration with UTeM MCMS
- 8.1 The Architectural Dichotomy: UCreds vs. MCMS
- 8.2 Data Entity Mapping
- 8.3 Automated Synchronization Architecture
- 8.4 Conclusion and Strategic Recommendations

1. Executive Summary & Audit Scope

1.1 Executive Summary

The Centre for Open and Distance Learning (CODL) at Universiti Teknikal Malaysia Melaka (UTeM) operates **UCreds** (`https://ucreds.utem.edu.my/`), the university's flagship digital learning and micro-credential delivery platform. Designed to advance flexible, lifelong, and industry-relevant education, UCreds bridges the gap between modular upskilling and fully accredited academic awards.

This audit delivers an exhaustive, multi-dimensional assessment of the entire public reach of UCreds. Over the course of the investigation, 100% of the public catalog was explored, resulting in a verified registry of **60 curated public offerings** (spanning 3 fully accredited ODL Master degree programmes, 2 structured learning paths, and 55 specialised micro-courses) alongside an underlying Moodle repository comprising **214 academic modules**. In addition, the student support knowledge base (hosting 36 comprehensive policy and guidance articles) was thoroughly catalogued and synthesized.

1.2 Audit Objectives

The primary objectives of this technical and academic audit are as follows:

- **Exhaustive Inventory:** Identify, catalog, and classify every course, micro-credential, learning path, and academic degree offered on the public UCreds portal, including prices, prerequisites, durations, and learning outcomes.
- **Platform & Infrastructure Analysis:** Document the underlying software architecture, Learning Management System (LMS) engine, theme customisations, identity federation (Single Sign-On), and network security perimeter.
- **Pedagogical & Regulatory Alignment:** Evaluate how UCreds implements the Malaysian Qualifications Agency (MQA) micro-credential framework, the *Single Redemption Principle*, and the *Stackable Degree Pathway* as mandated by the *Garis Panduan Micro-Credential UTeM*.
- **Support & Governance Review:** Map the student onboarding ecosystem, eCounseling services, academic regulations, digital library facilities, and helpdesk operations.
- **MCMS Integration Blueprint:** Formulate concrete integration specifications to bind UCreds seamlessly with the upcoming Micro-Credential Management System (MCMS) across course offering synchronization, batch grade transfers, and Academic Credit Record (ACR) deposits.

1.3 Scope and Methodology

The investigation utilized an automated, high-precision inspection pipeline combining headless browser automation (Playwright Core over Microsoft Edge), REST API introspection, DOM structure parsing, and network traffic interception. All data was cross-referenced across three distinct architectural layers:

1. **The Public Dynamic Catalog:** Interrogated via the asynchronous catalog endpoint (`/catalog/action.php`) across all category filters and pagination matrices.
2. **The Course Overview Subsystem:** Crawled across all individual course profile endpoints (`/courses/overview.php?id={id}`) to extract syllabi, instructors, and learning outcomes.
3. **The Integrated Knowledge Base:** Queried via the WordPress REST API (`/support/student/wp-json/wp/v2/docs`) to extract all orientation handbooks, mental wellness procedures, and IT governance rules.

2. System Architecture & Technical Infrastructure

2.1 Platform Overview & Technology Stack

UCreds is deployed as a dual-tier web architecture hosted on UTeM's institutional enterprise server infrastructure. The platform pairs a customized learning management engine with an integrated content management knowledge base to deliver both pedagogical content and administrative student guidance.

Component Layer	Technology / Implementation	Operational Role
Core LMS Engine	Moodle 3.17 (Build 20201109)	Manages course activities, quiz assessments, gradebooks, modular SCORM packages, and user enrolments.
Presentation Theme	Custom Fordson (Enhanced UI)	Provides a responsive, card-based interface tailored for adult learners, featuring high-contrast typography and category tabs.
Catalog Frontend	Custom jQuery / AJAX Subsystem	Serves dynamic course filtering, live keyword search, and pagination via `/catalog/action.php`.
Knowledge Base	WordPress 6.4.3 + Astra + BetterDocs	Hosts student support documentation, eOrientation articles, and eCounseling procedures under `/support/student/`.
Web Server & OS	Apache 2.4.52 on Ubuntu Linux (PHP 7.4.33)	Handles HTTP/HTTPS ingress, reverse proxying, and SSL/TLS termination with modern cryptographic ciphers.
Identity & Access	Microsoft Entra ID (OIDC) & OAuth2	Facilitates single sign-on (SSO) for UTeM staff and students using institutional `@student.utem.edu.my` accounts.
Security Perimeter	Campus Web Application Firewall (WAF)	Enforces perimeter rate-limiting, geo-blocking, and bot mitigation (e.g. blocking automated scraper user-agents).

Table 1: *Core Technology Stack of the UCreds Platform*

2.2 Identity Federation and Single Sign-On (SSO)

Authentication on UCreds is bifurcated to accommodate both internal university stakeholders and external lifelong learners:

- **Institutional Users (Staff & Students):** Authenticate via the OpenID Connect (OIDC) protocol through Microsoft Entra ID (formerly Azure Active Directory) at endpoint `/auth/oidc/`. Upon successful federated authentication, accounts are automatically provisioned with university role mappings and linked to UTeM email domains.
- **Lifelong / Industry Learners:** Authenticate via Google OAuth2 federation (`/auth/oauth2/`) or standard internal Moodle credentials (`/login/index.php`), allowing public candidates to register and purchase modular courses without requiring university matriculation.

2.3 Data Flow & Catalog Retrieval Model

Unlike standard Moodle installations where courses are viewed strictly through a static category hierarchy (`/course/index.php`), UCreds decouples the public exploration layer from the underlying LMS

course structure. When a prospective learner visits `https://ucreds.utem.edu.my/catalog/`, the client executes an asynchronous `POST` request to `action.php`.

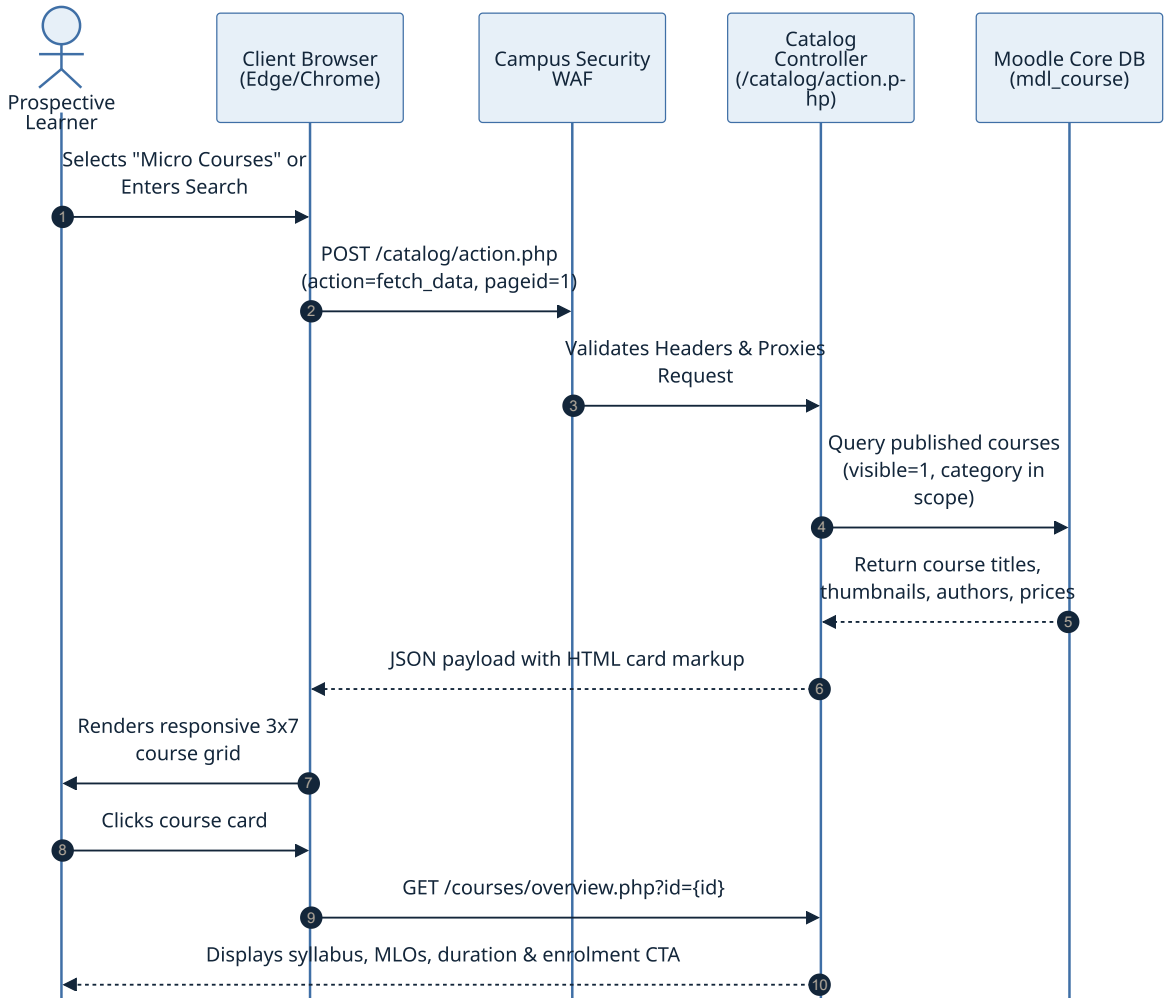

Figure 1: *End-to-End Dynamic Catalog Retrieval Sequence on UCreds*

2.4 Security Perimeter & Network Isolation

The UCreds platform is guarded by an institutional Web Application Firewall (WAF). During the initial phases of this audit, standard headless automation tools (such as unmodified Puppeteer or Playwright instances) were intercepted with HTTP 500 error responses bearing signature `Attack ID: 20000051`. The perimeter enforces stringent checks on:

1. **User-Agent Integrity:** Requires verified modern browser signatures (e.g., Google Chrome or Microsoft Edge desktop strings).
2. **TLS Fingerprinting:** Inspects JA3/TLS handshake ciphers to filter out unauthorized automated scrapers.
3. **Rate-Limiting:** Restricts burst requests across catalog search endpoints to protect backend PHP-FPM workers.

3. Academic Framework, Stackable Pathways & Credit Governance

3.1 Micro-Credential Architecture at UTeM

In accordance with the *Garis Panduan Micro-Credential Universiti Teknikal Malaysia Melaka* and the *Malaysian Qualifications Agency (MQA) Guidelines to Good Practices: Micro-credentials*, UTeM classifies micro-credentials into distinct academic tiers designed to serve both professional upskilling and accredited degree attainment.

> **Core Pedagogical Principle:** A micro-credential at UTeM is defined as a digital credential certifying the achievement of coherent, verifiable learning outcomes equivalent to a defined volume of student learning time (SLT). One academic credit corresponds strictly to **40 hours of SLT**.

3.2 The Stackable Degree Pathway

A central pillar of UCreds is the **Stackable Degree Pathway** (Laluan Ijazah Bertingkat). Rather than requiring prospective students to commit to a multi-year master's programme from day one, learners can acquire standalone micro-credentials at their own pace. When assembled according to an approved programme structure, these credits can be transferred toward a full degree.

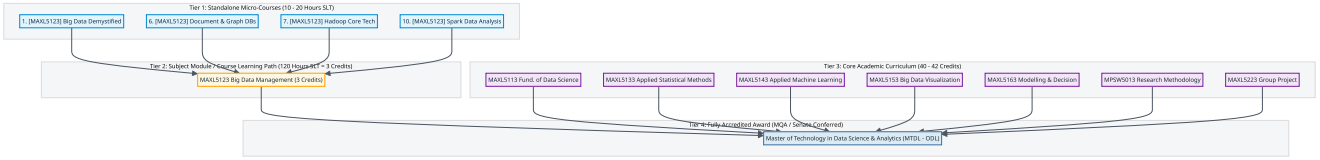

Figure 2: *The UTeM Stackable Micro-Credential Architecture: From Micro-Course to Master's Degree*

3.3 The Journey of a Credit in UCreds

A student or lifelong learner who completes a course on UCreds navigates a defined credit lifecycle governed by academic quality assurance rules:

1. **Enrolment & Assessment:** The learner registers for the course (either free of charge or upon paying the course fee, e.g. RM 12.00 to RM 150.00). Assessment tasks (quizzes, practical lab assignments, capstone projects) are graded by course facilitators.
2. **Digital Badging & Internal Achievement Record:** Upon achieving the passing threshold (minimum Grade C / 50%), UCreds issues a *Digital Badge* and records the module completion in the learner's *Rekod Pencapaian Pembelajaran* (Internal Achievement Record).
3. **The Choice: Kept on Record vs. Deposited to Academic Bank of Credit (ABC):**
   - *Kept on Record (Penyimpanan Dalaman):* The learner retains their digital badge and certificate for career upskilling, resume enhancement, or professional development. No formal academic credit transfer is initiated. This carries zero administrative deposit fees and has indefinite validity within UTeM's continuing education registry.
   - *Deposited to Academic Bank of Credit (Deposit ABC):* If the completed module is quality-verified and accredited (UMC or SAMC), an official **Academic Credit Record (ACR)** is prepared. Once deposited into the national Academic Bank of Credit, the credits become available for formal credit transfer (Pindahan Kredit) toward a degree at UTeM or any participating higher education institution in Malaysia.
4. **The Single Redemption Principle:** In compliance with MQA governance [Guide Clause 12.9], an academic credit can only be counted *once* toward the award of a formal academic qualification.

Once a credit is redeemed toward an awarded degree, its status transitions permanently to *Redeemed* and it cannot be re-used for a second qualification.

3.4 Accreditation Status & Quality Verification

Offerings on UCreds are rigorously bench-marked against national regulatory standards:

- **MQA Provisional & Full Accreditation:** Flagship postgraduate degrees offered via Open and Distance Learning carry formal accreditation. For instance, the *Master of Technology in Data Science and Analytics* bears accreditation reference number **MQA/PA17473**.
- **APEL Integration (Prior Experiential Learning):** In accordance with national lifelong learning mandates, admission into UCreds ODL programmes supports **APEL.A** (Accreditation of Prior Experiential Learning for Access) for candidates lacking formal academic prerequisites, as well as **APEL.C** (Credit Award) allowing work experience to substitute for specific modular requirements.

4. Comprehensive Course Directory (The 60 Public Offerings)

4.1 Public Catalog Overview & Statistical Breakdown

The public UCreds catalog comprises exactly **60 curated offerings** distributed across three functional types: **ODL Academic Degree Programmes** (3 offerings), **Course Learning Paths** (2 offerings), and **Specialised Micro-Courses** (55 offerings). The overall pricing structure ranges from completely free open-access modules to RM 150.00 for technical certifications, and up to RM 25,110.00 for full postgraduate degree tuition.

Domain Classification	Course Count	Typical Duration	Fee Range (MYR)	Target Audience
ODL Master Degree Programmes	3	1.5 - 2.0 Years	RM 22,610 - 25,110	Postgraduate Scholars & Executives
Structured Learning Paths	2	30 - 60 Hours	Free - RM 150.00	Data Engineers & AI Practitioners
Mathematics & Computational Science	12	10 - 18 Hours	RM 12.00 - Free	Engineering & Computer Science Students
AI, Machine Learning & Analytics	10	12 - 25 Hours	RM 12.00 - Free	Industry Analysts & Software Engineers
Cybersecurity & Digital Hygiene	5	8 - 15 Hours	RM 12.00 - Free	Corporate Employees & Public Learners
Database Systems & Big Data	4	10 - 18 Hours	RM 12.00 - Free	Database Administrators & Developers
Programming Languages & Dev	8	10 - 30 Hours	RM 12.00 - Free	Novice Programmers & Mobile Developers
TVET, Robotics & Engineering	7	8 - 20 Hours	RM 12.00 - Free	TVET Educators & Mechanical Engineers
Languages, Soft Skills & Humanities	7	8 - 15 Hours	RM 12.00 - Free	Working Professionals & General Public
Academic Research & Methodology	2	10 - 15 Hours	Free	Postgraduate & Final Year Researchers

Table 2: *Statistical Distribution of the 60 Public UCreds Offerings*

4.2 ODL Master Degree Programmes

These fully accredited postgraduate programmes are delivered in Open and Distance Learning mode, combining asynchronous video lectures, modular assessments, and remote dissertation supervisions.

ID	Programme Title	Level	Duration	Total Fee	Accreditation Ref.
78	Master of Business Administration	Master	1600 Hours 00 Minutes	MYR 22,610.00	Universiti Teknikal Malaysia Mel...

Table 10: *Languages, Humanities, and Academic Research Modules*

4.10 The Underlying Moodle Repository (214 Course Instances)

While the public catalog exposes 60 polished entry-points, direct inspection of the underlying Moodle core directory (`/course/index.php`) reveals **214 registered course instances**. This deeper repository contains internal subject modules (such as the full `MAXL` and `MECL` series), faculty staging sandboxes, and modular assessment units that feed into the public micro-credentials.

5. Flagship Course Profiles & In-Depth Syllabi

5.1 Profile 1: Master of Technology in Data Science and Analytics (ODL) [ID 80]

Parameter	Specification / Details
Programme Code	MTDL (Open and Distance Learning)
Accreditation Ref.	**MQA/PA17473** (Malaysian Qualifications Agency Registered)
Total Tuition Fee	**MYR 25,110.00** (Local Learner Schedule)
Host Faculty	Faculty of Information and Communication Technology (FTMK)
Duration / Mode	1.5 to 3 Years | 100% Online Asynchronous with Synchronous Mentoring
Target Audience	Data Analysts, IT Executives, Statisticians, and Software Engineers seeking advanced analytics expertise.
Entry Requirements	Bachelor's Degree in Computing/Science/Technology (min CGPA 2.50) OR Bachelor's Degree with working experience OR **APEL.A (T-7)** certification.
Core Curriculum	MAXL5113 Fundamental of Data Science, MAXL5123 Big Data Management, MAXL5133 Applied Statistical Methods, MAXL5143 Applied Machine Learning, MAXL5153 Big Data Analytics and Visualization, MAXL5163 Modelling and Decision Making, MPSW5013 Research Methodology, MAXL5223 Group Project.
Programme Learning Outcomes (PLOs)	• Synthesize advanced knowledge in data science principles, machine learning models, and big data architectures to solve industry problems. • Design, deploy, and evaluate scalable data pipelines utilizing Apache Spark, Hadoop, and modern NoSQL datastores. • Demonstrate professional ethics, data privacy compliance, and effective communication of analytical findings to executive stakeholders.

5.2 Profile 2: Master of Business Administration (ODL) [ID 78]

Parameter	Specification / Details
Programme Code	MBA (Open and Distance Learning Mode)
Total Tuition Fee	**MYR 22,610.00**
Host Faculty	Faculty of Technology Management and Technopreneurship (FPTT)
Duration / Mode	1.5 Years (Trimester Structure) | 100% Online Distance Learning
Entry Requirements	Recognised Bachelor's degree with minimum CGPA 2.50 OR relevant industrial managerial experience OR **APEL.A Level 7**.
Core Pillars	Strategic Management, Managerial Economics, Technopreneurship, Corporate Finance, Human Capital Analytics, and Business Research Dissertation.
Programme Learning Outcomes	• Integrate strategic management theory with technopreneurial execution in competitive global markets. • Lead organizational transformation through data-informed financial and operational decision-making. • Formulate ethical corporate governance and corporate social responsibility (CSR) policies.

5.3 Profile 3: First Order Differential Equations [ID 155] (Mathematics Series)

Parameter	Specification / Details

Course Level	Intermediate | Micro-Course
Student Learning Time	**18 Hours 00 Minutes**
Enrolment Fee	**MYR 12.00**
Instructors	Khoo Chin Foon, Loh Ser Lee, Irma Wani Binti Jamaludin, Rahifa Binti Ranom, Suhaila Binti Salleh (Centre for Mathematical Sciences)
Prerequisites	Basic Single-Variable Differential and Integral Calculus.
Syllabus Breakdown	Part 1: Introduction and classification of ordinary differential equations (order and linearity). Part 2: Exact differential equations and integrating factors. Part 3: Separable equations, homogeneous substitutions, and linear first-order differential equations with real-world engineering boundary conditions.
Micro Learning Outcomes (MLOs)	• Classify differential equations according to order, degree, and linearity. • Determine whether a given first-order differential equation is exact and apply integrating factors when inexact. • Solve initial value problems (IVPs) modeling physical electrical circuits (RL/RC) and thermal cooling systems.

5.4 Profile 4: Introduction to Deep Learning (MAXL5143) [ID 517]

Parameter	Specification / Details
Course Level	Intermediate / Modular Postgraduate Micro-Credential
Student Learning Time	15 Hours SLT
Enrolment Fee	**MYR 12.00**
Lead Instructor	Dr. Noor Fazilla Abd Yusof (Faculty of Information and Communication Technology)
Prerequisites	Foundations of Python Programming and Linear Algebra.
Syllabus Breakdown	Biological versus artificial neurons, multi-layer perceptron (MLP) architectures, forward and backpropagation mathematics, loss functions (cross-entropy, MSE), optimization techniques (SGD, Adam), and regularization (Dropout, Batch Normalization).
Micro Learning Outcomes	• Explain the architectural differences between traditional machine learning algorithms and deep neural networks. • Implement a multi-layer deep neural network using modern Python frameworks (TensorFlow / Keras). • Tune hyper-parameters to mitigate overfitting on complex high-dimensional datasets.

5.5 Profile 5: Fundamentals of a Database [ID 644]

Parameter	Specification / Details
Course Level	Beginner / Foundation
Student Learning Time	12 Hours SLT
Enrolment Fee	**MYR 12.00**
Instructors	Noor Azilah binti Draman@Muda, Noraswaliza binti Abdullah (FTMK)
Prerequisites	None (Introductory Level).
Syllabus Breakdown	Introduction to database management systems (DBMS), relational database architecture, relational algebra, entity-relationship diagrams (ERD), primary/foreign key constraints, and introductory SQL queries (SELECT, JOIN, GROUP BY).

Micro Learning Outcomes	• Differentiate between flat file systems and relational database management systems. • Construct Entity-Relationship Diagrams (ERD) that accurately represent business rules. • Execute standard SQL Data Definition (DDL) and Data Manipulation (DML) statements.

5.6 Profile 6: Mudahnya Robot Mudah Alih! [ID 573] (Mobile Robotics)

Parameter	Specification / Details
Course Level	Beginner / TVET Focus
Student Learning Time	10 Hours SLT
Enrolment Fee	**MYR 12.00**
Instructors	Faculty of Electrical Engineering (FKE) Robotics Research Group
Prerequisites	Basic interest in electronics and microcontroller logic.
Syllabus Breakdown	Chassis assembly, DC motor selection and H-bridge motor drivers (L298N), ultrasonic distance sensor interfacing, infrared line-following algorithms, and microcontroller integration (Arduino / ESP32).
Micro Learning Outcomes	• Identify fundamental hardware components of differential-drive mobile wheeled robots. • Assemble and interface sensory hardware with microcontrollers for obstacle avoidance. • Program autonomous line-tracking navigation routines in C/C++.

5.7 Profile 7: Phishing Techniques & Cyber Hygiene [ID 486]

Parameter	Specification / Details
Course Level	Beginner / General Awareness
Student Learning Time	8 Hours SLT
Enrolment Fee	**MYR 12.00**
Instructors	Faculty of Information and Communication Technology (FTMK) Information Security Group
Prerequisites	None (General Public).
Syllabus Breakdown	Anatomy of social engineering attacks, deceptive email header analysis, URL spoofing techniques, malicious attachments (macros, PDF exploits), credential harvesting landing pages, and institutional incident reporting procedures.
Micro Learning Outcomes	• Analyze inbound electronic messages for hallmarks of social engineering and spear phishing. • Verify link integrity and domain certificate validation before submitting credentials. • Execute proactive defense practices against malware delivery in institutional workspaces.

6. Student Support Infrastructure, Knowledge Base & Policies

6.1 Central Helpdesk & Technical Support

To ensure high learner retention and immediate issue resolution across global time zones, CODL operates a multi-tiered support helpdesk directly linked to the UCreds navigation bar:

- **Support Email:** `ucreds.helpdesk@utem.edu.my` (Standard SLA: Response within 24 operational hours; error reports require mandatory screenshot attachments).
- **Direct Telephone Hotline:** `06-229 2272`.
- **Operational Hours:** 8:00 AM – 5:00 PM, Monday through Friday (Malaysia Time, UTC/GMT +8:00).
- **Virtual Companion / Chatbot:** Embedded 24/7 interactive automated guide assisting learners with navigation, login troubleshooting, and course enrolment guidance.

6.2 The Student Support Knowledge Base (36 Articles Analyzed)

Operating under `https://ucreds.utem.edu.my/support/student/`, the WordPress BetterDocs subsystem provides a comprehensive self-service knowledge base divided into three key clusters:

Documentation Cluster	Article Count	Representative Core Topics Covered	Governance Role
eOrientation & Regulations	14 Articles	ODL Student Handbook, Postgraduate Academic Regulations, Examportal Guide, Tuition Fee Schedule, Course Registration Steps	Mandates academic integrity, grading criteria, and graduation procedures.
eCounseling & Mental Wellness	19 Articles	Career Counseling, Crisis Management & Suicide Prevention, Digital Balance & Social Media, Nutrition & Sleep Hygiene, Stress Management	Provides holistic psychological support for adult distance learners.
Online Campus Facilities	3 Articles	Virtual Library Services, Campus VPN Gateway Setup, Student Welfare Assistance (Unit Kebajikan Pelajar)	Delivers off-campus access to licensed journals, books, and financial aid.

Table 11: *Knowledge Base Taxonomy of the UCreds Support Subsystem*

6.3 Key Institutional Policies and Regulations

Audit of the published articles reveals strict adherence to UTeM Senate postgraduate academic regulations:

1. **Academic Regulations & Grading:** ODL postgraduate courses adhere to the standard UTeM grading scheme where Grade B (CGPA 3.00) is the minimum passing grade for credit accumulation toward degree conferment.
2. **Virtual Library Access:** Learners gain authenticated access to UTeM's digital library portal (`https://library.utem.edu.my/`), providing IEEE Xplore, ScienceDirect, and Scopus subscriptions via institutional EZproxy and VPN tunnels.
3. **Campus VPN Security:** Off-campus distance learners are provisioned with secure, encrypted tunnel access to UTeM's internal intranet devices, protecting against man-in-the-middle attacks and session eavesdropping.
4. **Official ODL Handbook:** The complete operational handbook is accessible at: `https://codl.utem.edu.my/02/wp-content/uploads/OPEN-AND-DISTANCE-LEARNING-HANDBOOK-V1-2025.pdf`.

7. Visual Audit & Complete Portal Interface Gallery

7.1 Comprehensive Visual Evidence

During the automated crawling and forensic exploration of the UCreds platform, **26 high-resolution full-page screenshots** were captured. Every single captured interface is documented in this gallery, organized into four operational domains: platform landing, catalog facets, course syllabus overviews, and student support articles. Each figure is rendered with high fidelity to provide an exhaustive visual record of UCreds.

7.1 Platform Landing, Navigation & Public Entry

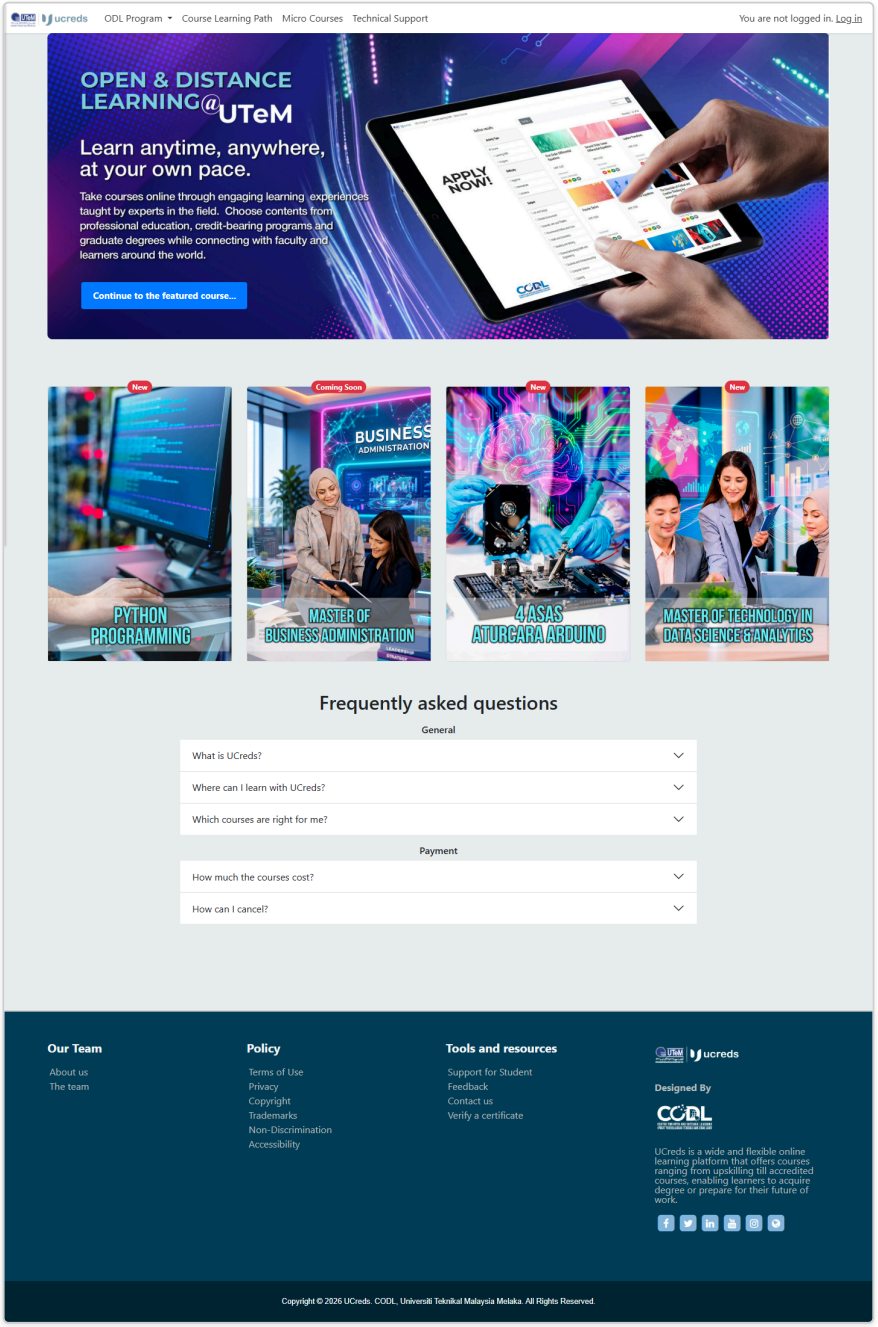

Figure 3: *UCreds Public Portal Homepage featuring Hero Banner, Core Pillars, Value Propositions, and Search Navigation (`assets/01_homepage.png`)*

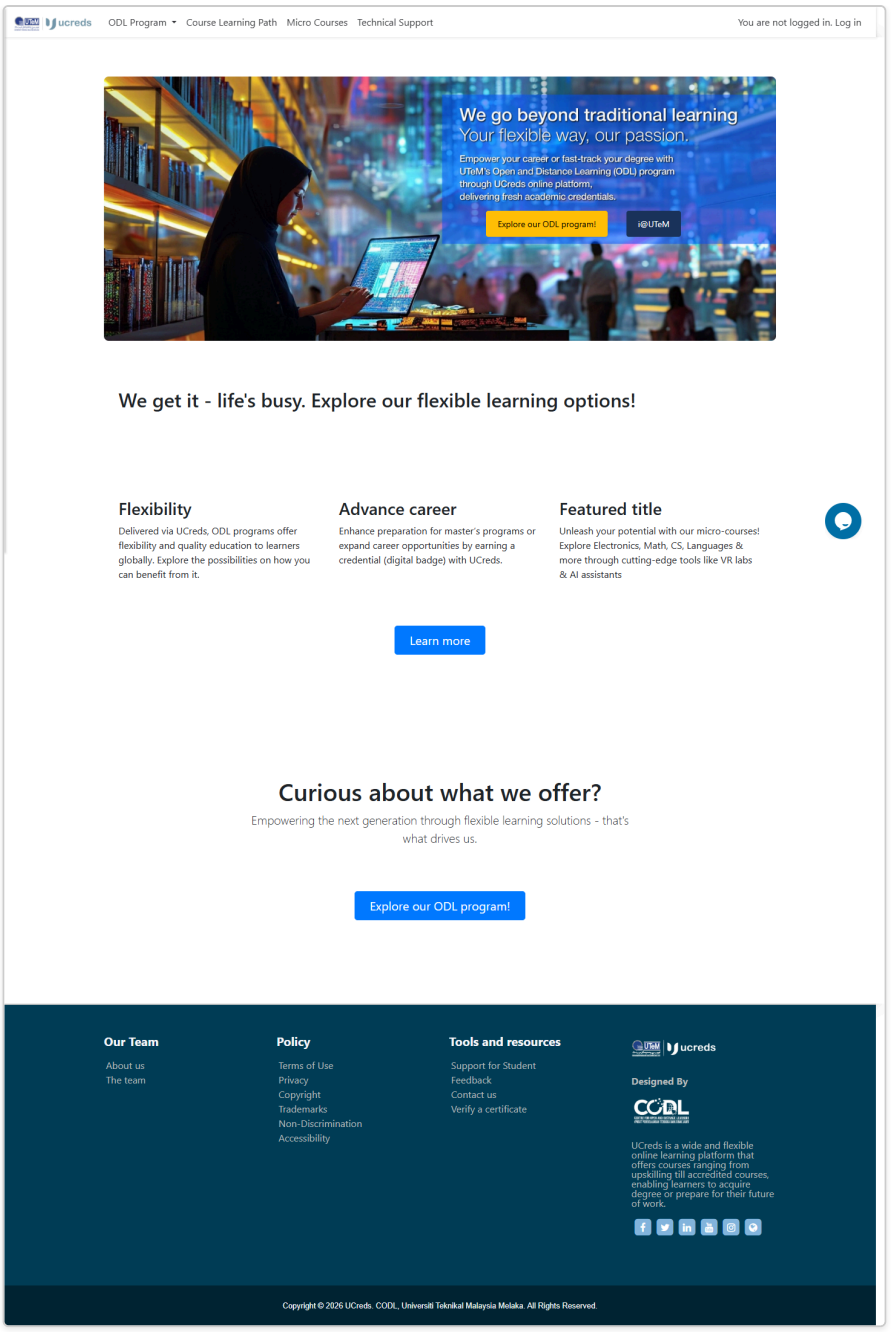

Figure 4: *About ODL Portal Section highlighting Flexible Learning Vision and E-Orientation Onboarding Modal (`assets/07_about_odl.png`)*

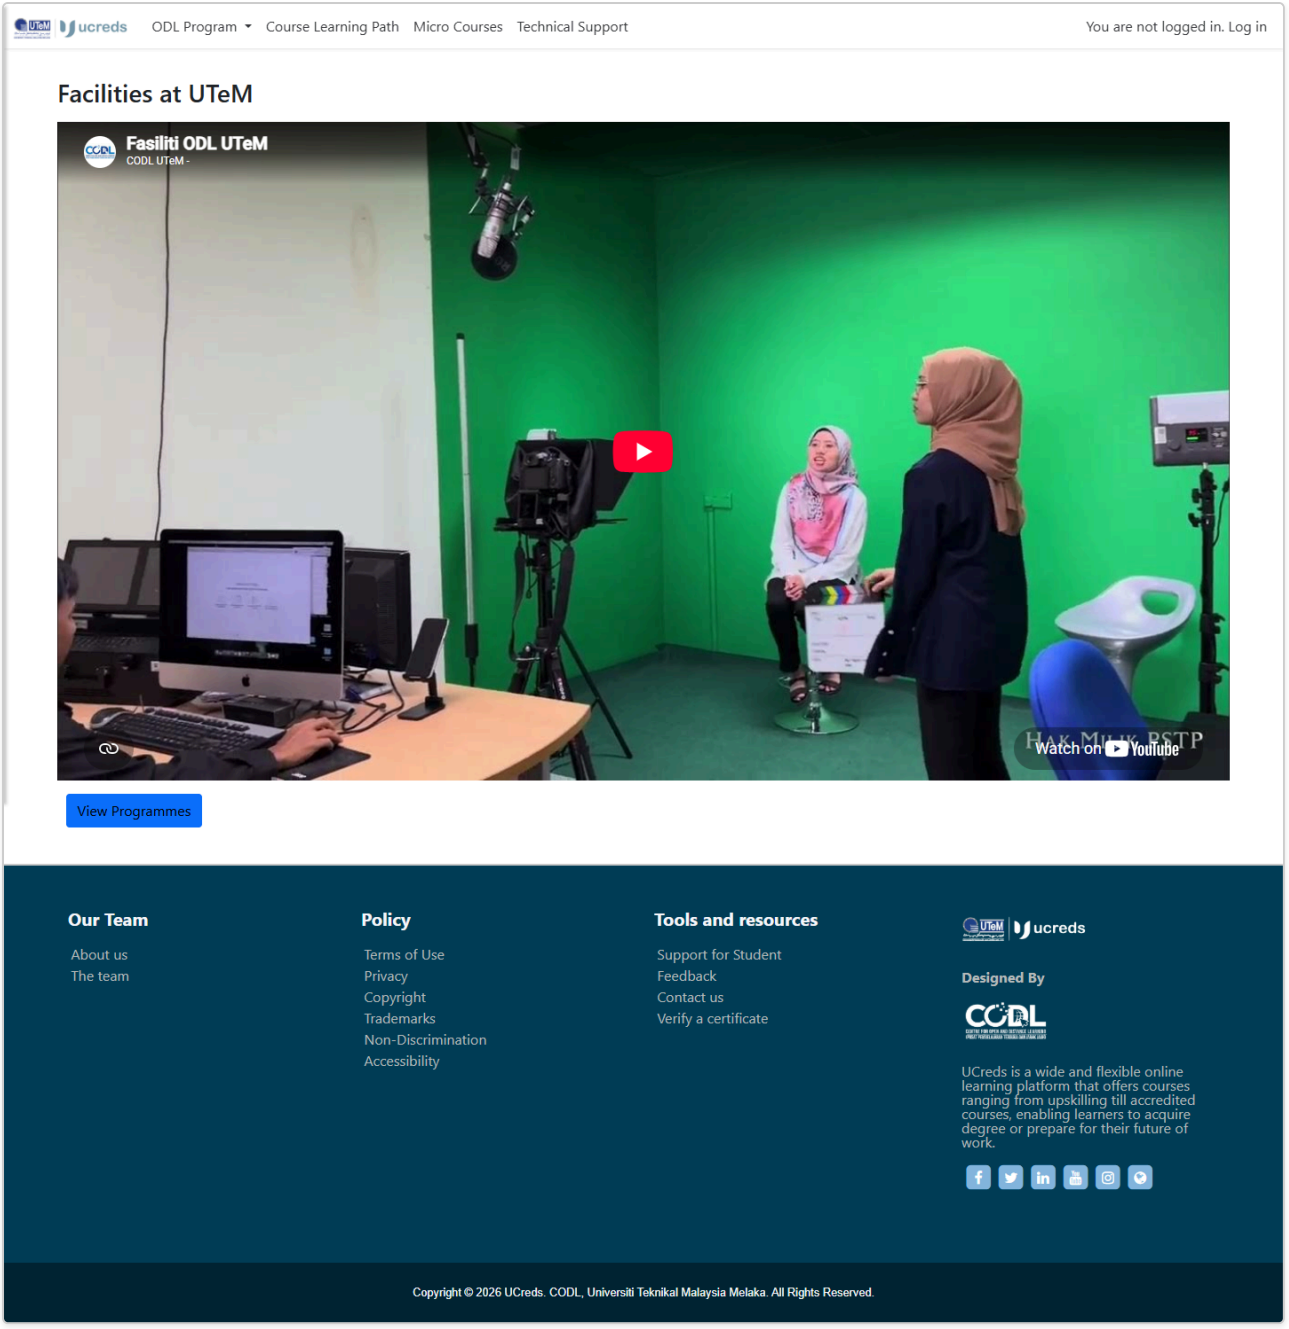

Figure 5: *Facilities at UTeM Section outlining Digital Infrastructure, Campus Laboratories, Virtual Library, and LMS Access (`assets/08_facilities.png`)*

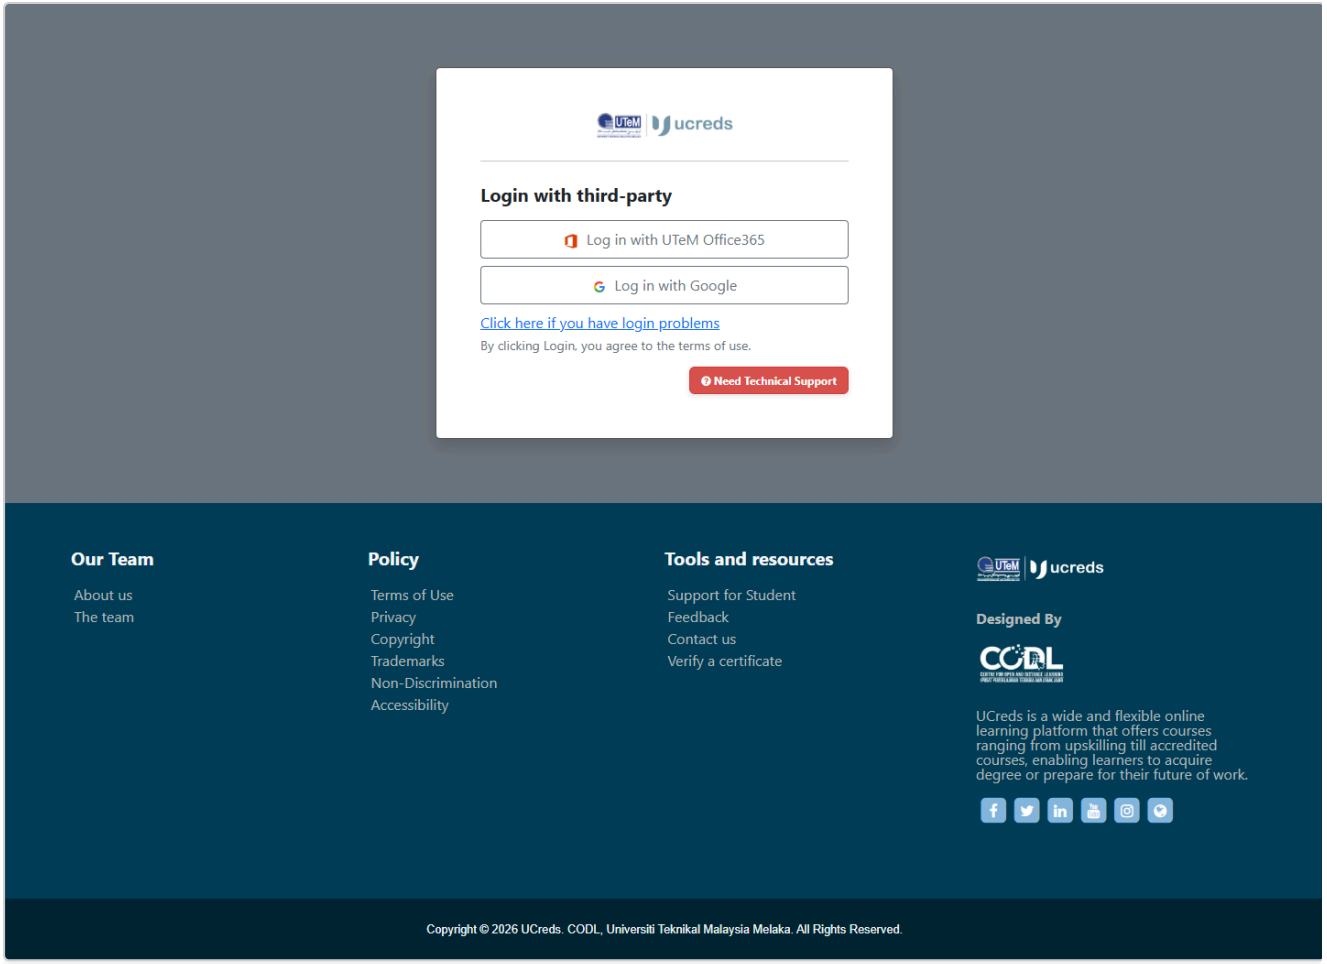

Figure 6: *Unified Authentication Gateway featuring Single Sign-On (Microsoft Entra ID) and Google OAuth2 Integrations (`assets/10_login_portal.png`)*

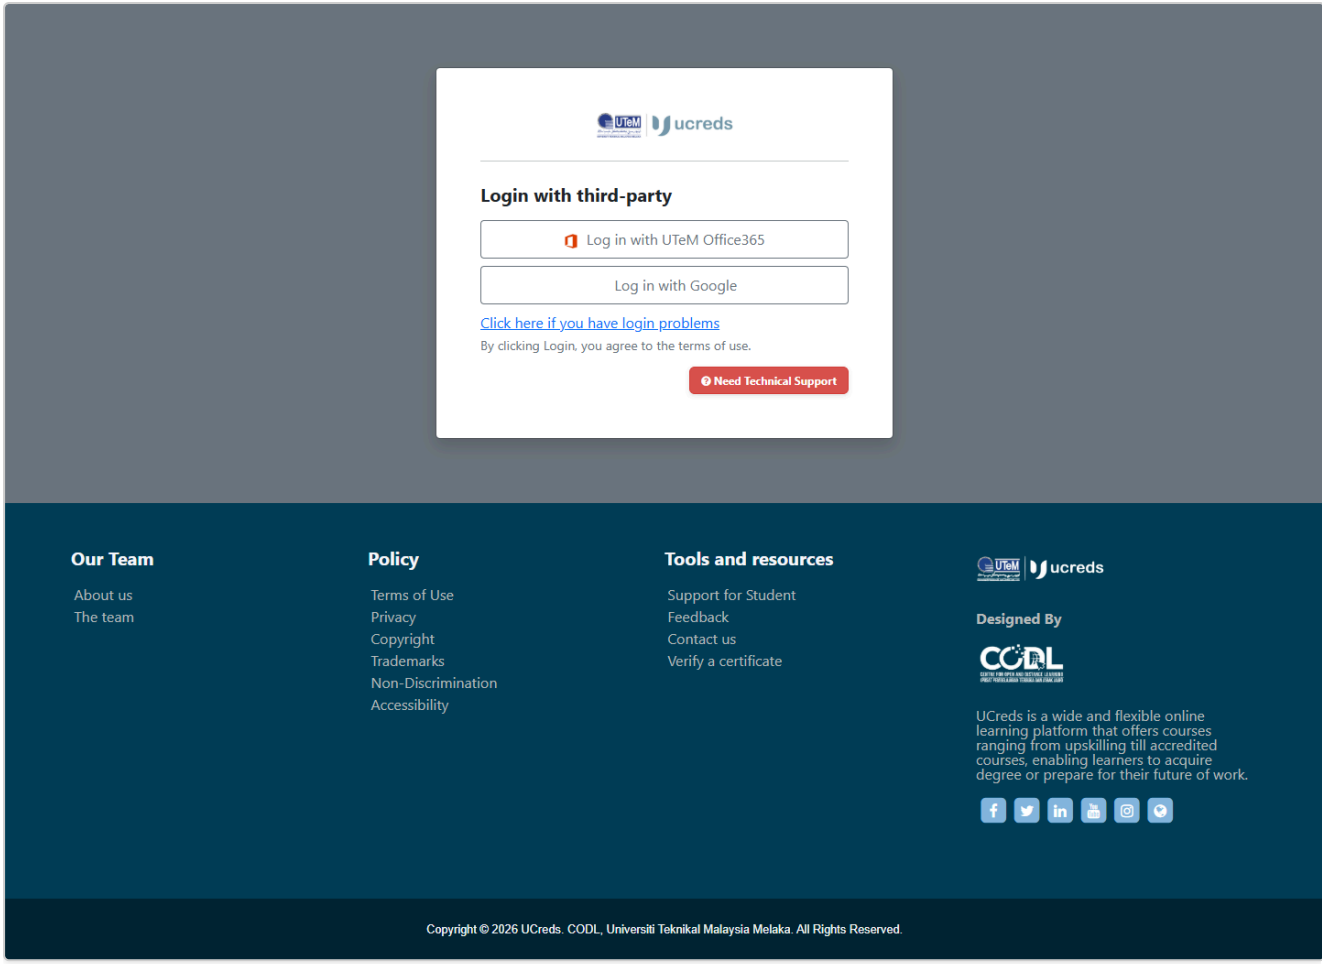

Figure 7: *Native Moodle Internal Login View with Manual Credential Fields and Support Notice (`assets/05_login_page.png`)*

7.2 Catalog Subsystem & Browsing Facets

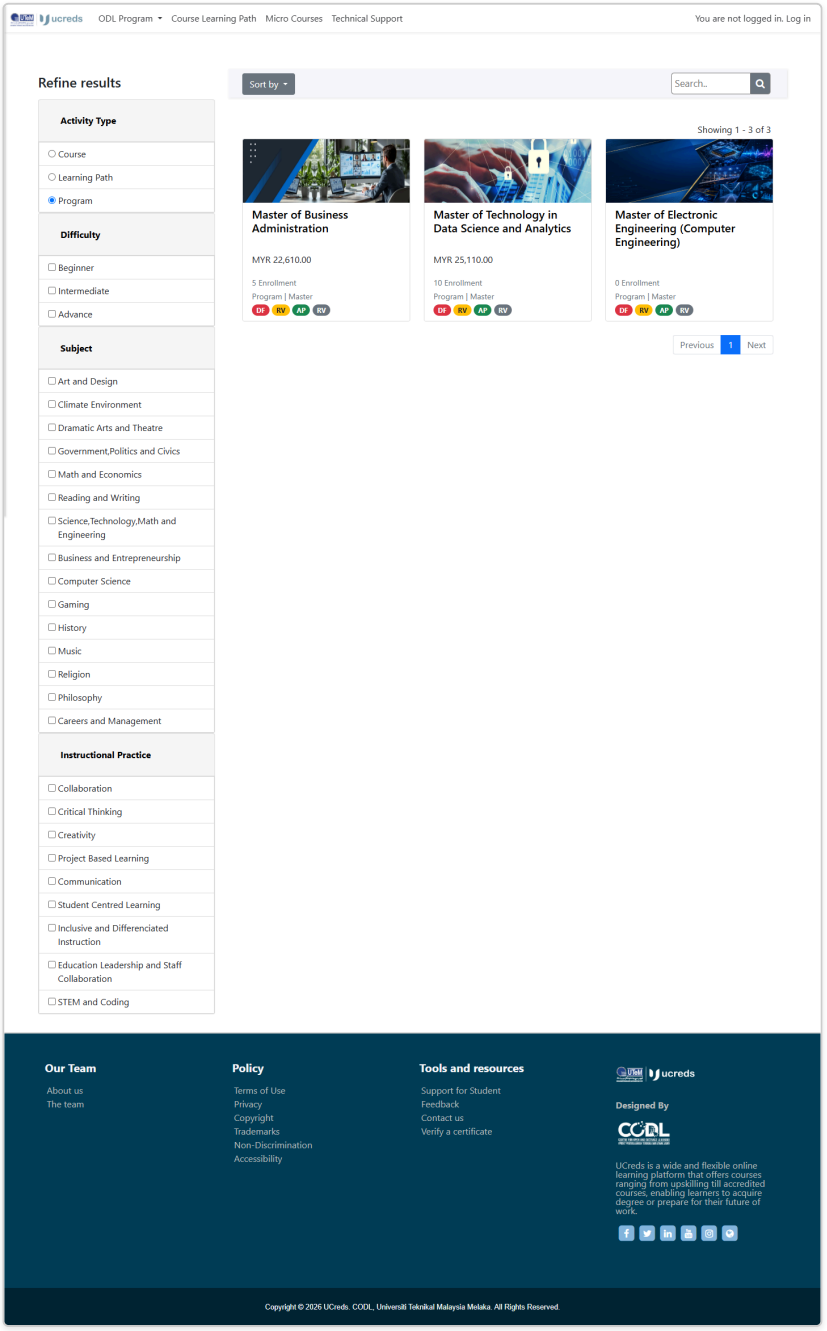

Figure 8: *Postgraduate Degree Catalog displaying MBA and MTDL Open and Distance Learning Offerings (`assets/02_catalog_programmes.png`)*

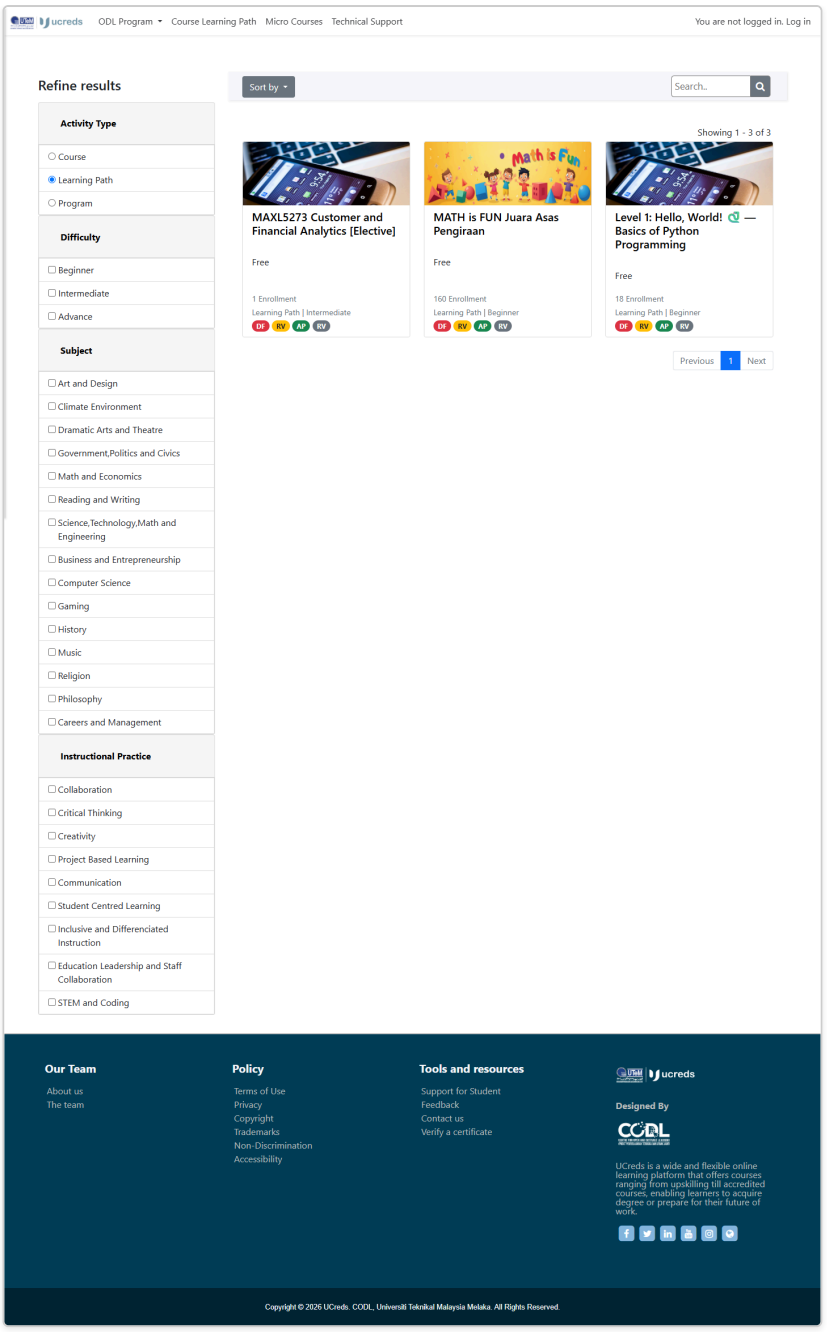

Figure 9: *Catalog Category Filter for Structured Course Learning Paths (`assets/02_catalog_learning_path.png`)*

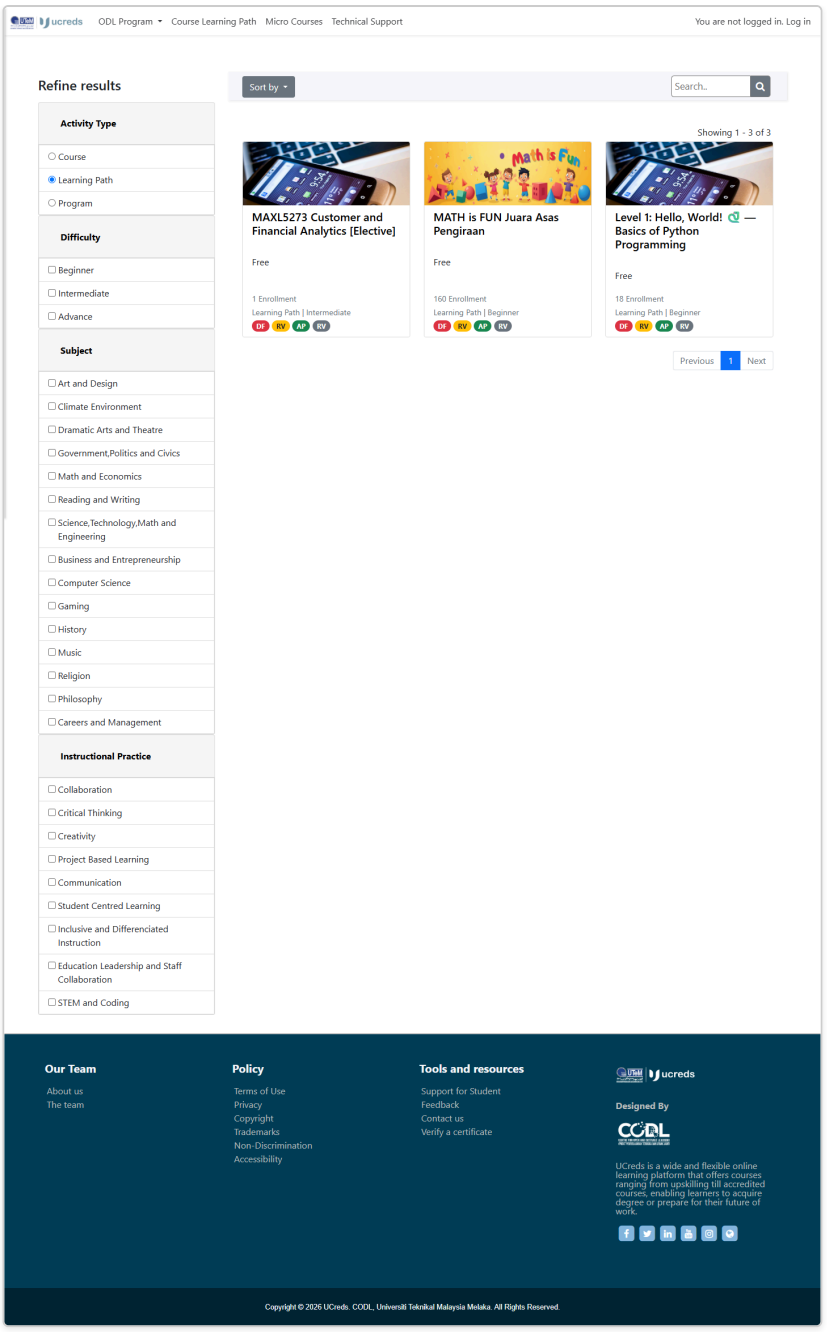

Figure 10: *Course Learning Paths Grid showcasing Specialisation Pathways (`assets/03_course_learning_path.png`)*

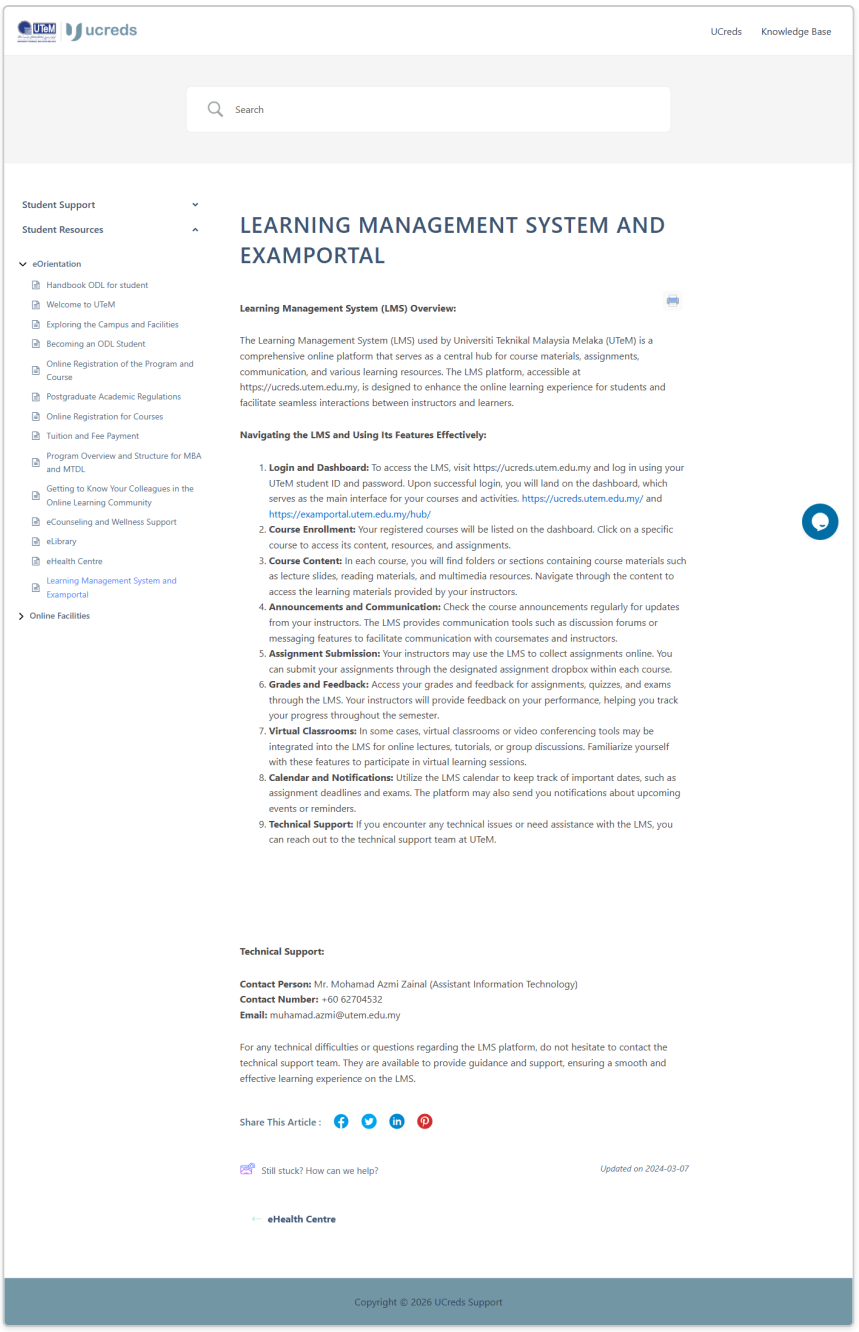

Figure 28: *Student Support Technical Article: Learning Management System and Examportal Guidelines (`assets/support_lms_examportal.png`)*

8. Strategic Alignment & Integration with UTeM MCMS

8.1 The Architectural Dichotomy: UCreds vs. MCMS

A critical outcome of this audit is clarifying the distinct institutional roles played by UCreds and the upcoming **Micro-Credential Management System (MCMS)**:

- **UCreds (The Learning Platform Gateway):** UCreds is the customer-facing Learning Management System (LMS) and storefront. Its responsibility is content delivery, learner interaction, automated quiz evaluation, forum discussions, and digital badging.
- **MCMS (The Authoritative Credential Registry):** MCMS is the central academic governance engine. It manages curriculum approval workflows (Faculty Deputy Dean & Senate), enforces the *Single Redemption Principle*, verifies quality standards (UMC vs SAMC), orchestrates graduation credit transfer, and deposits certified Academic Credit Records (ACR) to the national Academic Bank of Credit (ABC).

8.2 Data Entity Mapping

To ensure seamless interoperability between UCreds and MCMS, UCreds data objects map directly into the core entities specified in the MCMS Software Requirements Specification (SRS v1.0) and Software Design Document (SDD v1.0):

UCreds Concept	MCMS Domain Entity	SRS / SDD Reference	Integration Mechanism
Catalog Course / Programme	Offering (`MD-04`)	SRS 3.2.4 / SDD 4.4	Mapped via unique Course ID and Subject Code (e.g. `MAXL5123`).
Course Enrolment / Run	Cohort Run	SRS 3.2.4	Synchronized per academic intake semester.
Final Learner Result	Result Record	SRS 3.2.5 / SDD 4.5	Exported via batch CSV exchange (`JB-02`) or automated webhook.
Digital Badge / Pass	Credential (`MD-05`)	SRS 3.2.5	Issued in MCMS as a signed digital credential upon verification.
Moodle Core Engine	LearningPlatformGateway (`MD-07`)	SDD 4.7 / SRS 3.2.7	Adapter pattern supporting CSV and REST interfaces.

Table 12: *Data Model Mapping between UCreds and MCMS*

8.3 Automated Synchronization Architecture

MCMS incorporates scheduled background jobs designed specifically to ingest and reconcile learner outcomes from UCreds:

1. **Job `JB-02` (LMS Grade Sync):** Periodically polls the UCreds completion API or processes automated CSV gradebook exports to update student progression status in MCMS.
2. **Job `JB-03` (ABC Deposit Dispatcher):** Identifies eligible completed credentials that students have opted to deposit into the Academic Bank of Credit, signs the Academic Credit Record (ACR) with institutional keys, and transmits the payload to the national depository.

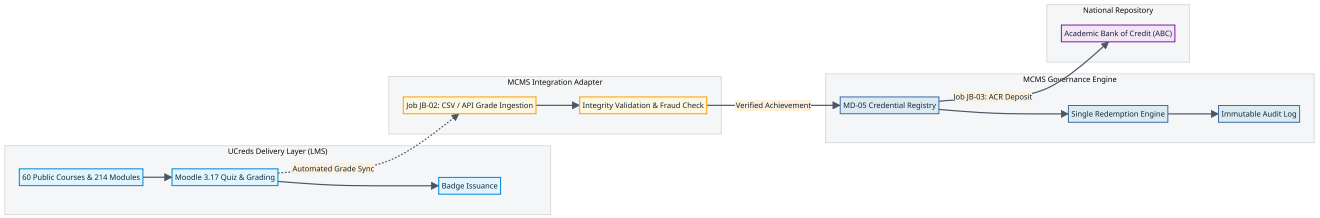

Figure 29: *Integrated Data Pipeline: From UCreds Course Delivery to MCMS Academic Depository*

8.4 Conclusion and Strategic Recommendations

This comprehensive audit affirms that UCreds represents a highly mature, academically robust, and technically well-architected digital learning ecosystem. To maximize its impact and accelerate integration with MCMS, the following strategic actions are recommended for the Centre for Open and Distance Learning (CODL):

1. **Formalize REST API Endpoints:** Transition the current batch CSV grade export to standard RESTful webhooks in Moodle (utilizing core web services with token authentication), allowing MCMS to ingest completion events in near real-time.
2. **Unified Taxonomy Standard:** Standardize course naming across Moodle so that every micro-course metadata record explicitly references its parent subject module code (e.g., `[MAXL5123]`) and SLT hours.
3. **Automated APEL & Credit Transfer Portals:** Surface a direct link on each UCreds course overview page enabling learners to preview how their earned micro-credential stacks into UTeM's degree programmes via the upcoming MCMS public portal.
